MS. ANHOUSE: Everybody, good morning. My name is --

AUDIENCE MEMBER: Louder.

AUDIENCE MEMBER: It should be red.

MS. ANHOUSE: Now you can hear me. There I am. Hi, this Public Hearing is now called to order. Today is October 24, 2017. The time is now, according to my watch, 10:12. This hearing is scheduled until noon, but we are going to run a little over because we started late.

My name, as I told you earlier, is Chari Anhouse. I'm an Associate General Counsel here at the Department of Health and Mental Hygiene. Also here today is Steven Schwartz, the New York City Registrar, and Gretchen Vanwye, who is the Assistant Commissioner for Vital Records. Svetlana Burdeynik is my assistant. She is the Assistant to the Secretary of the Board of Health. She is here as well.

We are here for a Public Hearing on

1
2 whether the Board of Health should adopt
3 amendments to Article 207 of the New
4 York City Health Code. A notice of
5 intention to amend this Article was
6 published in the City Record on
7 September 20, 2017. A copy of the first
8 page of the notice of intention will be
9 provided to the reporter, who is here
10 taking down the minutes, and we're being
11 videotaped as well, to include in the
12 record.

13 The purpose of today's hearing is to
14 illicit comments and information to
15 assist the Board of Health in
16 determining whether to adopt the
17 amendments to Article 207. Persons
18 wishing to speak today were asked to
19 pre-register, a few of you did. As you
20 know, there's a sign-in sheet
21 circulating, and there's another one
22 outside. We will get to everyone.

23 When you come up to testify, please
24 identify yourself for the record, spell
25 your name, give your title and the name

1

2

of the organization you represent, if
any. And please remember you must limit
your remarks to five minutes. There are
many of you here today. If you could,
go shorter than five minutes. Five
minutes is a very, very long time to
actually speak. It's amazing.

3

4

5

6

7

8

9

I will give you a two-minute
warning. I'm going to hold up my
fingers, like this (indicating), which
means victory, peace, and two. So that
will give you a warning if you're
getting there. I will also give you a
one-minute warning.

10

11

12

13

14

15

16

So we are going to get under way, if
there are no questions at this point
about the process.

17

18

19

(No response.)

20

MS. ANHOUSE: Okay. Great.

21

The first person who has signed up
to testify is Joshua Taylor. Is Joshua
Taylor here?

22

23

24

MR. TAYLOR: Yes.

25

MS. ANHOUSE: Come on up, sit in the

1
2 seat right there and give your name. I
3 think the court reporter probably knows
4 how to spell it.

5 MR. TAYLOR: It's Joshua Taylor,
6 J-O-S-H-U-A, T-A-Y-L-O-R. I am the
7 President of the New York Genealogical
8 and Biographical Society. I also have a
9 typed copy of my remarks, if that would
10 be helpful.

11 Members of the Commission, thank you
12 for allowing public comments on this
13 very important issue. I'm Joshua
14 Taylor, and I represent the New York
15 Genealogical and Biographical Society.

16 We are the oldest and largest
17 genealogical organization in the State
18 of New York. We strive to discover,
19 share, and preserve the stories of all
20 New York families. We represent
21 thousands of members and constituents
22 across the United States and serve
23 millions of individuals who have a
24 connection to New York City in their
25 ancestral past.

1
2 We applaud the Commission's desire
3 to hear from genealogical organizations
4 and those who would be impacted by the
5 proposed access limitations to New York
6 City's birth and death records.

7 Simply stated, genealogical research
8 and discovering family history requires
9 access to public records. Birth and
10 death records are core materials used by
11 genealogists for research. They are
12 often the only records that provide
13 precise information relating to
14 parentage, places and dates of birth and
15 death, causes of death, and information
16 that is critical to establishing
17 evidence to advance our research. In
18 essence, these records are crucial links
19 for our work.

20 Proposed limitations would greatly
21 impede open access to these public
22 materials for millions of individuals
23 who are seeking their connection to New
24 York City. We believe the proposed
25 regulations are not in line with current

1
2 practices.

3 The 2011 revision of the model vital
4 records act, on which proposed
5 restrictions appear to be based, has not
6 yet found any mainstream support. To
7 date, only one state, Oklahoma, put the
8 restrictions in place, and multiple
9 states have, in fact, allowed greater
10 levels of access to vital records.

11 The Commonwealth of Virginia opens
12 death records after just 25 years. In
13 Pennsylvania, they open records after 50
14 years, and Michigan offers free
15 digitized death records through the
16 state archives through 1952.

17 The U.S. Department of Health and
18 Human Services released final
19 regulations on protective health
20 information and privacy in September of
21 2013. These processes permit the
22 release of information about a deceased
23 individual after 50 years.

24 We also believe that the leaders of
25 NAPHSIS are considering revising the

1
2 proposed periods for the Model State
3 Vital Statistics Act and encourage
4 members of this Commission to open a
5 formal dialogue with NAPHSIS in the
6 course of making the decision.

7 Further, we do not believe that
8 birth and death records for genealogical
9 research is a cause of identity theft.
10 We, as genealogists, share the same
11 fears of identity theft and privacy
12 concerns. We have been victims of major
13 data breaches at Yahoo, at Target, at
14 Home Depot, at Anthem, and most
15 recently, Equifax.

16 In recent years, the media has
17 reported the theft of millions of
18 identities, which made access to
19 verified information, particularly in
20 the course of deaths, even more vital.
21 Proper implementation of public death
22 records actually prevents identity
23 theft.

24 There is no evidence that the states
25 who adopted more moderate open records

1
2 policies, that I referenced earlier,
3 have experienced higher levels of
4 identity theft. Instead, theft centers
5 on commercial companies such as Equifax,
6 not from genealogists.

7 The record restrictions, further,
8 would directly impede those seeking to
9 trace immigrants from New York City
10 during the 20th and 21st century. They
11 are members of New York City's diverse
12 community, the Puerto Rican, the
13 Vietnamese, the Chinese, Korean, and
14 other backgrounds. Without these
15 essential resources, they will be unable
16 to trace and document their families.

17 In addition, those who celebrate and
18 recognize their ancestors through
19 lineage organizations, including the
20 Dutch period, the American Revolution,
21 and other entities, would be unable to
22 gather these materials to complete their
23 applications. These barriers to
24 understanding and preserving New York
25 City's past across our diverse and long

1
2 history would be devastating.

3 We've organized our members to
4 request that the Commission allow an
5 alternative to provide access to those
6 materials necessary for research.
7 Access to birth records after 105 years
8 or with proof of death, only a small
9 percentage of the population is actually
10 expected to live beyond this period.
11 Access to death records after 50 years
12 and access to a death index after 25
13 years. We will accept much shorter
14 embargo periods as well.

15 To identify theft, we also propose
16 the Commission consider providing early
17 access to death records to known members
18 of the genealogical community, perhaps
19 even those who are identified as
20 affiliated with a New York-based
21 organization. These materials could
22 even include access to New York City
23 death records after 25 years or access
24 to informational certificates.

25 These informational certificates, a

1
2 non-certified copy of information from
3 the record, would be help for research
4 without being able to substantiate
5 someone's identity.

6 The use of these records go beyond
7 genealogical research. Information
8 relating to causes of death and patterns
9 of genetic diseases is absolutely
10 critical to understanding one's family
11 health history. There are numerous
12 cases, which I'm sure you'll hear today,
13 that are used to understand a family's
14 extended health history for the
15 treatment and prevention of genealogical
16 diseases.

17 Finally, and most importantly, we
18 believe that the limitations in the
19 transfer of records to the municipal
20 archives threatens the preservation of
21 the records themselves.

22 As an organization, we exist to
23 discover, share, and preserve the
24 stories of New York's families. Without
25 open access to public records and the

1
2 proper conservation and preservation of
3 these materials, the potential to lose
4 these documents remains high.

5 We strongly encourage the Department
6 of Health to work in close conjunction
7 with the New York City Municipal
8 Archives to ensure the safe and timely
9 transfers of New York City's birth and
10 death records. Thank you for the
11 opportunity to provide comment on this
12 matter.

13 MS. ANHOUSE: Mr. Taylor, do you
14 have a copy of your testimony?

15 MR. TAYLOR: Yes.

16 MS. ANHOUSE: If you could give it
17 to us up here and a copy to the court
18 reporter, if you have more than one.

19 MR. TAYLOR: (Hanging.)

20 MS. ANHOUSE: Thank you.

21 MR. TAYLOR: (Hanging.)

22 MS. VANWYE: Thank you.

23 MS. ANHOUSE: One is fine.

24 MR. TAYLOR: Genealogists like
25 copies.

1
2 MS. ANHOUSE: Next up is Terry
3 Koch-Bostic.

4 MS. KOCH-BOSTIC: Koch.

5 MS. ANHOUSE: Koch. I'm sorry.

6 MS. KOCH-BOSTIC: Thank you for the
7 opportunity to speak to the council
8 today. I'm Terry Koch-Bostic. That's
9 K-O-C-H, hyphen, B, as in boy,
10 -O-S-T-I-C from Mineola, New York.

11 I am the Chapter Representative and
12 head of the New York Metro Chapter of
13 the Association of Professional
14 Genealogists, also known as the APG.
15 This chapter covers all of New York
16 City, New York State, Connecticut and
17 New Jersey. We have over 300 members in
18 this chapter alone.

19 I am also the Vice President of the
20 National Genealogical Society. It's the
21 largest national organization of
22 individual members of genealogists and
23 family historians. I'm also a member of
24 the New York Genealogical and
25 Biographical Society's Advisory

1
2 Committee, of which you just heard from
3 our president.

4 The first point I'd like to make is
5 that a lot of your argument is based on
6 statistical data that you gathered in
7 your Basis and Purpose and Privacy
8 Concerns. Under that section, your
9 statistical argument is not clear, and
10 it's actually not supported by the data.

11 You have interchanged New Yorkers
12 and New York City residents, and they
13 are extremely different populations and
14 are measured in different ways by the
15 American Community Survey, which is the
16 yearly statistical review of data in
17 between the ten-year census periods.

18 You state "New Yorkers are living
19 longer than ever before. The 2010
20 Census shows that almost half a million
21 New Yorkers are over the age of 75."
22 That would indicate "New Yorkers" is
23 state data. Why do you show a chart
24 with the number of people over 75, which
25 is about 462,000, when this is totally

1
2 irrelevant to the discussion of limiting
3 birth records to a proposed 100 years,
4 as we're proposing, and 125 years, as
5 you are proposing?

6 Again, and I quote, your document
7 states, "Since 2010, the American
8 Community Survey estimates that the
9 total number of New York City residents,
10 age 75 and over, has increased to more
11 than 492,000, with more than 1.25
12 million over the age of 65." Again,
13 this is irrelevant to the argument about
14 what age records should be opened and
15 accessible.

16 Again, these are unfounded
17 conclusions. Data from health
18 departments across the U.S. describe
19 higher rates of disease, diabetes, heart
20 problems, cancer, obesity, and this does
21 not support greater numbers of people
22 living longer. The reverse may actually
23 be true.

24 Other data offered in your Privacy
25 Concerns states, "In 2005, 585 New

1
2 Yorkers died between the ages of 100 and
3 114. In 2014, that number rose --" and
4 so on, to 2015; 901. You cannot
5 extrapolate that number out of data that
6 was taken for the State of New York.

7 New York City is measured by the
8 American Community Survey on a yearly
9 basis. Populations 65,000 and larger
10 are measured yearly. Populations under
11 20,000 are only measured every five
12 years. You cannot combine that data and
13 extrapolate that this number is the same
14 for the whole State of New York and New
15 York City.

16 In addition to that, you really
17 don't offer precise data of exactly how
18 many people actually live over a hundred
19 years. In that body of number -- First
20 of all, it's probably statewide.
21 Secondarily, there may be one person who
22 made it to 114 over a period of five
23 years, as opposed to thinking that we
24 have this growing population moving
25 towards 114 years.

1
2 So where is the proof of this
3 danger? It's not in the statistical
4 numbers that you've provided, and, as
5 Josh said, there's a number of other
6 issues here now, in which more and more
7 states are allowing broader access, even
8 for adoptions and divorces.

9 Later you will see a chart by Alec
10 Ferretti where he shows you the amount
11 of identity theft by states that are
12 more generous in their access and those
13 that are less generous.

14 Medical history, this I can speak to
15 directly. This is promoted by our
16 Surgeon General and the New York City
17 Department of Health, that we are
18 supposed to know about our family
19 medical history.

20 My younger sister was diagnosed in
21 1992 with breast cancer. This came as a
22 surprise to our family. She was only 36
23 years old. My father had remembered
24 that when he was ten, his own mother was
25 diagnosed, also at the age of 36. She

1
2 had radical mastectomy surgery at
3 Bellevue Hospital, which was probably
4 the premiere hospital in the United
5 States at that point, and radiation in
6 1929.

7 She did live, but it also destroyed
8 the ability for her to ever use her
9 right arm again --

10 MS. ANHOUSE: I'm sorry, Ms. Bostic.
11 I was listening to you, and I didn't
12 give you a warning. I'll give a you few
13 more seconds.

14 AUDIENCE MEMBER: We can't hear you.

15 AUDIENCE MEMBER: Could you use the
16 microphone?

17 MS. ANHOUSE: I'm sorry, Ms. Bostic.
18 I wasn't looking at my timer. You have
19 30 more seconds.

20 MS. KOCH-BOSTIC: That was not five
21 minutes --

22 MS. ANHOUSE: That was five minutes,
23 ma'am. That was five minutes, ma'am.

24 MS. KOCH-BOSTIC: Okay. The bottom
25 line is that there have been three

25

generations of women in my family that gave been diagnosed with breast or ovarian cancer in their late 30s. Every one of them has died within one to one and a half years.

The only reason I am here today is because I have done the family health history, and I took the most stringent measures to live when I was diagnosed.

MS. ANHOUSE: Ma'am, your time is up.

MS. KOCH-BOSTIC: Thank you.

MS. ANHOUSE: Thank you. I am sorry for not giving you a warning.

Next on the pre-registered list is Avrum Geller. Is Avrum Geller here?

MR. GELLER: Yes, I am.

MS. KOCH-BOSTIC: Here you go (handing).

MS. ANHOUSE: Let the record reflect that Ms. Koch-Bostic just handed over a copy of her testimony, as did Joshua Taylor earlier.

Mr. Geller, I promise I will be

15
16
17
18
19
20
21
22
23
24
25

better with the stopwatch.

MR. GELLER: Hi, my name is Avrum Geller, A-V, as in Victor, -R-U-M; G-E-L-L-E-R. I am the son of Marvin William Geller and Miriam Naomi Ellis. I was born on December 30, 1943, in Newark, New Jersey.

It's evident that better means of securing identity, than genealogical information, should be in general use for the protection of individuals and the protection of society. These have included physical recognition tests, such as fingerprints and footprints, photographs, and signatures.

Now science has added more sophisticated and reliable techniques, including improved electronic fingerprint recognition, iris scans, facial recognition, and DNA analysis, among others. In addition, the uses of closely-guarded passwords provide some measure of protection.

On the other hand,

1
2 widely-disseminated information, such as
3 genealogical and biographical
4 information and Social Security numbers,
5 provide insecure means of securing
6 identity, and the widespread use of such
7 information, therefore, in itself,
8 creates a security risk for everyone.
9 Identity theft is a national problem
10 that is largely the result of reliance
11 on these insecure tests for identity.

12 Historically, genealogical
13 information on birth, marriage, and
14 death has been a matter of public
15 record. Births were announced, marriage
16 bans were posted, and deaths were
17 published as official policy. These
18 practices continue in a majority of
19 geographic jurisdictions, not only as
20 public policy, but also informally in
21 birth, marriage, and death announcements
22 in published media and now social media.

23 In seeking to restrict and suppress
24 accurate information on births and
25 deaths, New York City is an outlier. In

1
2 the New York City government structure,
3 the Bureau of Vital Statistics is a
4 semi-autonomous unit within the
5 Department of Health and Mental Hygiene.

6 The primary mission of the
7 Department of Health is to promote
8 public health. Suppressing cause of
9 death information prevents individuals
10 and their extended families from
11 knowledge of health risks that emerge in
12 studies of extended families conducted
13 by genealogists.

14 I have personally alerted client
15 families to health risks, such as colon
16 and breast cancers, that have emerged
17 from the cause of death data collected
18 in the course of genealogical work and,
19 thus, have saved lives.

20 The problem of familial health risk
21 is greatest in endogamous populations,
22 such as the Ashkenazi Jewish family
23 histories in which I primarily work.
24 Family members are helpful in obtaining
25 information; however, I also encounter

1
2 unmarried persons, sometimes an only
3 child, who have died without issue.

4 Here, New York City creates a barrier to
5 providing information, perhaps critical,
6 to family health.

7 Similarly, restrictive New York
8 State Law on adoptions prevents adopted
9 individuals from understanding their own
10 health histories. But that's a problem
11 that needs to be addressed separately,
12 not here.

13 Suppression of death certificates
14 make it difficult to determine place of
15 burial, important to some religious and
16 ethnic groups who practice honoring
17 family members with cemetery visits and
18 prayer.

19 The practice of restricting access
20 to birth and death records works against
21 the welfare of individuals, families,
22 and the public at large. Use of vital
23 records for identity purposes is an
24 unstable foundation. The public is best
25 served by making public records

completely open to the public. Thank
you.

MS. ANHOUSE: Thank you, Mr. Geller.
Next up is Brooke Schrier -- I hope I'm
saying the name correctly. You will
correct me. -- Ganz.

MS. GANZ: Brooke Schrier Ganz,
B-R-O-O-K-E, S-C-H-R-I-E-R, G-A-N-Z.
President and founder of Reclaim the
Records.

Good morning. Reclaim the Records
is a 501(c)3 non-profit activist group
of genealogists, historians,
researchers, and journalists advocating
for open public access to our vital
records held by government agencies and
libraries.

We are the largest archival records
activist group in America, measured by
both membership and impact. We have
approximately 4,800 subscribers to our
newsletter, and of them, about 820
people signed up within 50 miles of
Manhattan, based on their GOIP. That's

1
2

15
16
17
18
19
20
21
22
23
24
25

about a fifth of our membership.

In the past three years, Reclaim the Records has successfully sued two different New York City agencies under the New York State Freedom of Information Law, or FOIL. We filed against DORIS, Department of Records and Information Services, in 2015. We filed against the New York City Clerk's office in 2016.

We won settlements both times. We won attorneys' fees our second time. We won millions of records and made them available to the public.

In the past six months, Reclaim the Records has expanded beyond the City and successfully used FOIL to fight the New York State Department of Health for 17 months to win the first ever public copy of the entire New York State Death Index from 1880 to 1956.

We've recently used New Jersey's open record law, OPRA, to fight the New Jersey Department of Health to win and

1
2 publish, for the first time ever, the
3 entire New Jersey marriage index. Those
4 millions of records are online for free
5 now too.

6 And now we are here talking to you,
7 the New York City Department of Health.
8 I'm here this morning to talk about why
9 we in the genealogist community and the
10 open records community don't like you
11 and don't trust you.

12 I am here this morning because when
13 researchers and genealogists come to our
14 organization through e-mail and social
15 media, they tell us that you are the
16 worst department in the country to deal
17 with. The most difficult. The most
18 obstinate.

19 You are known as the worst in the
20 entire country, and the fact that you
21 are now trying to restrict records
22 access even more is a bad joke. We
23 don't trust your motivations in putting
24 forward these proposed rule changes,
25 because we have witnessed and documented

1
2 your behavior over many years where
3 you've greatly restricted records and
4 access in ways that are jaw dropping or,
5 frankly, illegal.

6 We don't believe when you say these
7 rules are being changed to protect the
8 public. We think you're changing them
9 to protect yourselves. For example, up
10 until a few months ago, the New York
11 Public Library had lovely books of birth
12 indexes and death indexes, in book
13 format and microfilm, on the library
14 shelves for decades. Then, in a
15 horrendous rape of the New York State
16 Freedom of Information Law, your office
17 apparently decided these public records
18 shouldn't be public anymore and in the
19 middle of the night, your organization
20 came and took the books off the shelves.

21 Well, we at Reclaim the Records were
22 appalled when we heard that. So we
23 talked to the Committee on Open
24 Government in Albany, and they were
25 appalled too. In fact, they used the

1
2 phrase, "throw the book at them," and we
3 intend to.

4 I guarantee you that our
5 organization will be making a third
6 lawsuit to get those records back within
7 the next year, because there is no way,
8 in this government climate, that we can
9 let government organizations come in and
10 take public records -- "retroactively
11 classify" as the phrase goes -- and take
12 them from the public.

13 At our two conferences with them,
14 they believe that this would absolutely
15 be a breach of the Freedom of
16 Information Law, and this is not the
17 first time we've had issues with the
18 government, mainly your department,
19 taking these records.

20 In fact, one of the primary reasons
21 we transitioned to a 501(c)3 non-profit
22 organization status this past year was
23 to raise the six-figure war chest to
24 take you on in court. That is how
25 deeply we feel about this, and how much

you have wronged people by taking records.

But you guys didn't limit yourselves to just interfering with New York's Freedom of Information Law, no. We are currently suing Missouri; we have a case pending. And when we won their records in discovery, guess whose e-mails we found in their records? That's right. Both of you who are sitting here today.

We found your e-mails talking to the Missouri Registrar about how to limit Missouri's records. We have copies of your e-mails, copies of your phone conversations, and we've posted them on our Twitter feeds.

Missouri's bad behavior in this case won them a 2017 Annual Foilies Award from the EFF, ranking them alongside such open records luminaries as Trump and Sheriff Clarke. A few months later the Investigative Reporters and Editors Group, IRE, also awarded this case as one of the five finalists for their

1
2 Golden Padlock Award for the worst use
3 of open records by a government agency.

4 Then we have e-mails that, in the
5 course of our Sunshine Lawsuit, Reclaim
6 the Records won copies of, and we found
7 in these the Registrar of Vital
8 Statistics, Steven Schwartz, Assistant
9 Commissioner, Gretchen Vanwye, saying
10 "That's good news," when they heard that
11 these records were going to be withheld
12 from the Missouri public. This Missouri
13 case is still pending. We've helpfully
14 posted these to our Twitter accounts,
15 but there's more.

16 Unfortunately, we're almost out of
17 time. But I will be yielding the rest
18 of my statements to other members of
19 Reclaim the Records to explain why we
20 want these records back, and why we have
21 another set of suggestions for you that
22 we feel much are much more reasonable.
23 Thank you.

24 AUDIENCE MEMBER: I haven't seen you
25 since the genealogy conference. This is

my check (handing), --

MS. ANHOUSE: Sir.

AUDIENCE MEMBER: -- and I hope others will support her. This is a tragedy.

MS. ANHOUSE: Sir, sir. If people are going to speak out of turn -- you know, I want everybody to get their time. We're going by the sheet.

AUDIENCE MEMBER: I'm sorry. The sign-up sheet did not get all the way around.

AUDIENCE MEMBER: It's been going around.

MS. ANHOUSE: It was going around. If it's not around -- Svetlana, are you here? I don't know where my assistant is. Hold on. Raise your hand if you want to speak and you haven't signed up.

AUDIENCE MEMBER: I don't think it was clear whether this was an attendance sheet or a speaker list.

MS. ANHOUSE: For the record and one more time: If you want to speak, you

1
2 have to sign the sheet. We will go in
3 order. If you're not signed up to speak
4 and you speak out of turn, we might have
5 to ask you to leave. We want everybody
6 to be able to speak on the record.

7 Thank you.

8 The next person who I have on the
9 list up here is Georgia Tann.

10 MS. TANN: Hi, I'm Beulah George
11 Tann, B-E-U-L-A-H, G-E-O-R-G-E, T-A-N-N,
12 and people call me Georgia.

13 After hearing from Brooke, I'm sure
14 you're happy to hear from me. I have
15 discussed this access to birth records
16 issue very thoroughly with Governor
17 Lehman. He purchased -- I mean, I
18 placed with him three children who were
19 removed from their families in
20 Tennessee, and Governor Lehman was very
21 clear about this. He thought that
22 nobody needed to know where they came
23 from and that birth records should be
24 destroyed.

25 So the books that you took out of

1
2 the New York Public Library, you
3 shouldn't put them back. You should
4 just burn them. Nobody needs any access
5 to any of their genealogy. No one needs
6 to know where they came from, and you
7 don't need to be accountable to the
8 public.

9 Just like I wasn't when the federal
10 government started to investigate my
11 child-placing home in the 1950s. The
12 Attorney Generals in New York and
13 California both vowed to investigate my
14 child-trafficking regimes, and neither
15 one ever took any action.

16 It seems to me that the powers that
17 be are in support of your policy of just
18 sweeping everything under the rug. I
19 don't know who you're trying to protect
20 exactly, but hiding all of these records
21 is really good for baby traffickers and
22 I hope that you keep it up.

23 I hope that you ban all access to
24 all birth records and you burn all those
25 goddamn books that were in the New York

Public Library. I thank you very much and I will concede the rest of my time to Brooke and Reclaim the Records if they have more to add.

MS. ANHOUSE: It doesn't work that way. Ms. Ganz already had her time. We are going to the next person on the sheet. It's C. -- I believe it's Swepp, S-W-E-P-P. C. Swepp.

MS. TANN: That was me. I was just afraid you wouldn't call me as Mrs. Tann.

MS. ANHOUSE: Okay. The next person on the list is J. Auslander.

MR. AUSLANDER: Hi, I missed the last public hearing when you restricted access to death records to only the deceased. As many of you will know, that public hearing was not really made public, and, despite your best efforts, I'm glad that word about this meeting got out. The memo, as we all know, is not written to inform the reader, but to protect the writer, and something is

wrong here.

There are 57 Departments of Health in the United States, one for each state, territory, Washington D.C., and because it was probably the first, New York City. Each of them have different rules of access, sort of like the gun laws of the United States. There's holes here, and then there's closures there.

I have to ask, based on my observation in 25 years as an amateur and professional genealogist, is the New York City Department of Health clinically paranoid?

You say that you are concerned about identity theft, yet by not releasing even the index to birth and death records, we cannot verify, like with the Social Security Death Index, if someone is using the identity of a dead person. We can't verify information. If you're dead, you are public domain.

Mayor Guiliani proved that when the

1
2 kid's juvie record was out to the press
3 before the kid hit the ground. Hiding
4 things does not help anyone. I do
5 Holocaust research. I have had clients
6 who had to go to the courts to prove
7 someone was legally dead because we
8 could not get a 1991 death certificate.

9 A death certificate is the only
10 proof of death under the law.
11 Everything else is hearsay. But we need
12 that to find out the anecdotal
13 information, if nothing else, where that
14 person was buried.

15 It just strikes me as absurd that
16 you are closing the barn doors with the
17 leaks of public information. I
18 understand there was a case a couple of
19 years ago where one of your employees
20 was selling blank birth certificate
21 forms. Then, to take this out on a
22 legitimate community.

23 We used to be able, as genealogists,
24 as professionals, to get a pass to
25 research birth and death indexes that

1
2 were beyond the purview of the New York
3 Public Library. Why we had to do this
4 is absurd. I mean, again, to verify
5 facts, we can get a marriage record
6 after 50 years. But in New York, we
7 can't look at divorce for a hundred
8 years. Why is that? My guess is
9 something analogous to this: That some
10 politician had an ugly divorce and
11 wanted to keep that secret. Who are we
12 really protecting here?

13 MS. ANHOUSE: (Indicating.)

14 MR. AUSLANDER: Thank you, two
15 minutes.

16 I don't understand this. It's -- I
17 mean, a lot of the work in Holocaust
18 restitution, overcoming the legacy of
19 the pre-marriage equality era where
20 people could not will their estates to
21 their long-term partners down the line,
22 is what we do.

23 It's really an obstruction of
24 justice to prevent us from settling
25 estates, because I can't prove that -- I

1
2 can't order my own uncle's death
3 certificate from 1960, because I'm not a
4 close enough relative, my
5 great-grandfather from 1956.

6 My uncle's children that he never
7 had or the wife that he never married
8 could order these documents, but I
9 cannot and this is absolutely absurd.
10 Who are you really protecting? Not the
11 public, yourselves. And if you open
12 this up, who would really suffer? The
13 benefits, think of the all the money you
14 could make off the sale of those
15 documents. If nothing else, the indexes
16 should be available to the public.
17 Thank you.

18 MS. ANHOUSE: Thank you,
19 Mr. Auslander. The next person on my
20 list is Alexander Calzareth, am I saying
21 that correctly?

22 MR. AUSLANDER: Auslander is spelled
23 A-U-S-L-A-N-D-E-R. Jordan, J-O-R-D-A-N.

24 MS. ANHOUSE: I'm going to ask
25 people not to speak to the court

reporter, I mean the stenographer. She just needs to make sure she gets everything.

MR. AUSLANDER: I was just giving her the spelling of my name, which I neglected to do at the beginning of my statement.

MS. ANHOUSE: Okay. Mr. --

MR. CALZARETH: My name is Alexander Calzareth, C-A-L-Z-A-R-E-T-H. I am a strong supporter of Reclaim the Records and their work, so I'm going to be continuing reading their statement in support.

Your department's proposed rule changes of 75 years and 125 years are taken directly from a suggested template known as the Model Vital Statistics Act and Regulations, specifically the version that was drafted in 2011.

You mention that clearly in your proposal, as if it were the most logical and most normal thing to conform New York City's outdated policies to this

1
2 fancy new Act, but what you neglected to
3 mention in your proposal is that this
4 Act's implementation was placed on hold
5 by the Department of Health and Human
6 Services in April of 2012. The federal
7 government didn't want to implement it.
8 You also failed to mention that this Act
9 is not in place almost anywhere else in
10 the United States, thankfully.

11 We say "thankfully," because this
12 Model Act was drafted in 2011 with
13 absolutely no input solicited or
14 received by the researching community,
15 genealogist community or public records
16 experts. There's a highly restrictive
17 framework that would cut public access
18 to vital records across the country,
19 built in secret by a committee. That's
20 why it hasn't been gaining traction with
21 the states.

22 But guess whose name shows up as one
23 of the only members of that small
24 working group who drafted this flawed
25 and restrictive act? Yup, it's Steven

1
2 Schwartz, again, the New York City
3 Registrar, and joining him in that
4 working group is the only person in the
5 whole country who was meant to be
6 representing the concerns of the law
7 within that working group, Refreido
8 Lopez (phonetic), the formal General
9 Counsel for who else, the New York City
10 Department of Health.

11 Taken all together, your department
12 shows a clear pattern of behavior that
13 has a direct opposition to our right to
14 transparency and the public's right to
15 know about our government. So we are
16 very skeptical about your department's
17 state and motivations for this proposed
18 rule change which would only further
19 deny public records access.

20 So instead of these unnecessary,
21 overboard rule changes, Reclaim the
22 Records has put together a super
23 proposal for the Board with rules that
24 we think would be far more appropriate.
25 These rules balance the public's right

1
2 to know with protections against actual
3 identity theft. They are informational
4 only records.

5 New York City should follow the lead
6 of other vital records jurisdictions,
7 such as California, create one of those
8 informational-only, non-certified copies
9 of vital record. These informational
10 records would display all of the same
11 data as original records in a photocopy
12 image, but would have the addition of
13 large red text printed right on the page
14 stating they are for information
15 purposes only, not to be used as proof
16 of identity. They would also lack the
17 printed or raised seal of the City.

18 If this department is really as
19 concerned with identity theft as you
20 publicly claim to be, then you should
21 have no problem following the lead of
22 other states in making available these
23 sorts of non-certified documents. It
24 would allow researchers immediate access
25 to the crucial information we seek

1
2 without having any risk that the
3 information contained in them could be
4 used as false documentation.

5 No waiting periods, New York City
6 should make these non-certified
7 informational-only copies of birth
8 certificates and death certificates
9 available to be public without any
10 waiting period. None. Zero. This is
11 what's done in California, Massachusetts
12 and several other states, in some cases
13 dating back to the time when the states
14 were still colonies without any proof in
15 ill effect.

16 This bickering over the propriety of
17 50 years versus 75 years is ridiculous,
18 because both time frames are completely
19 non-existent in numerous other states.
20 From North Carolina to Iowa to
21 Minnesota, all states with no waiting
22 period, not even for birth certificates,
23 because these states offer non-certified
24 informational-only copies.

25 Our right to access public records,

1
2 our records, our families' records, is
3 not up for negotiation by government
4 agencies seeking to shirk their duties
5 to civic transparency and
6 accountability. We are not going to sit
7 here with you and horse trade our
8 rights.

9 Open up the index data; New York
10 City should immediately release the
11 City's basic birth index and death index
12 to the public as open data in actual
13 database format, such as SQL or CSV,
14 with updates on an annual basis. The
15 majority of other vital record
16 jurisdictions of the U.S. publish this
17 information every year without any fuss
18 whatsoever, and yet New York City seems
19 determined to hide it.

20 These indices are not actual
21 certificates of any kind. They are
22 merely the findings, basically just a
23 big spreadsheet with basic information,
24 such as surname, given name, sex, date
25 of birth or death, or other locality of

1
2 birth or death, and the certificate
3 number.

4 The New York Genealogical and
5 Biographical Society has recommended
6 their petition to the department that
7 you should also add a new column of
8 information, burial locations, to this
9 index, and we agree with them that this
10 would be very helpful information.

11 Furthermore, New York City agencies
12 are already required to release their
13 internal data sets to the public under
14 Local Law 11 of 2012, also known as the
15 Open Data Law. New York City Council
16 voted on and passed this legislation on
17 February 29, 2012, and it was signed
18 into law on March 7, 2012. A formal
19 request was made to this department
20 through the City's official SAPRATA open
21 data portal on May 1, 2013 --

22 MS. ANHOUSE: Mr. Calzareth, your
23 time is up.

24 MR. CALZARETH: Thank you.

25 MS. ANHOUSE: Thank you. Okay. I

cannot really read this. I think it's
Phyllis Sternemann; is that correct?

MS. STERNEMANN: Yes.

MS. ANHOUSE: Thank you. Come on up
and give your name for the record.

MS. STERNEMANN: Good morning. My
name is Phyllis Sternemann,
S-T-E-R-N-E-M-A-N-N. I'm from
Manhasset, New York. I have no prepared

So Art Blazer, who just came up, can come now to testify.

MR. BLAZER: Thank you. It's Art Blazer, A-R-T, B-L-A-Z-E-R. I'm here as an individual to speak against your proposal. I have been the victim of credit card fraud or identity theft three times. So I understand exactly where you're coming from. However, your proposal would not in any way, shape or form do anything to prevent that.

The first time I was a victim, it was before there were computers, even in my office and no computers at home. The problem, really, we have today is internet access not information. Because if someone goes to the archives, they're going to be able to find the records that they should be able to find because they're probably there for legitimate purposes.

The criminal is not going to take the time to go down to the City Archives to get a copy of your 75-year-old birth

1
2 records or 50-year-old death records and
3 use that for identity fraud. Yes, it
4 could happen. For the most part, you're
5 going to hack Equifax or some other
6 organization where they'd get a lot of
7 information very quickly and use it that
8 way.

9 Also, I think you miss the necessity
10 of genealogy for wills and probates. I
11 had a case of a family member who passed
12 away, and the lawyer in the case had to
13 research the genealogy to find all of
14 the relatives. Had they not had access
15 to my records, they would've spent many,
16 many hours and days and weeks trying to
17 find this information. But because I
18 had done the genealogy, I turned this
19 over to the attorney and saved them a
20 huge amount of time and saved the estate
21 a great deal of money.

22 I think there is a compromise here
23 which you can reach, and that is: If it
24 isn't broken, don't fix it. I think the
25 answer is to turn over the records to

1
2 the archives, but put it on a computer
3 that's not accessible to the internet.
4 This way, a legitimate researcher can go
5 to the archives and find the information
6 that they need, and the criminal, who
7 just wants the easy way out to find --
8 he doesn't care whose identity he
9 steals, he just wants to steal
10 somebody's identity. Therefore, if he
11 can't get it easily, he's not going to
12 take the trouble to go find it.

13 I think open records in the archives
14 is the right answer, and perhaps you
15 shirking internet access is a better
16 compromise. Thank you.

17 MS. ANHOUSE: Thank you, Mr. Blazer.
18 Going back to the other list, Alex --
19 Alec. Sorry -- Ferretti.

20 MR. FERRETTI: Good morning, my name
21 is Alec Ferretti. That's A-L-E-C,
22 F-E-R-R-E-T-T-I. I'm from Bellmore, New
23 York.

24 I recently applied for dual Italian
25 citizenship. Descendants of Italian

1
2 immigrants can be legally recognized as
3 a citizen if they fit certain criteria.
4 I have to provide the birth, marriage,
5 and death certificates of five
6 generations of my ancestors, many of
7 whom within New York City.

8 Under current law, I am not legally
9 entitled to my grandfather John's birth
10 certificate. He was born 89 years ago
11 and has been deceased for 20. If my dad
12 hadn't been able to sign the form for
13 me, I would've had to go to court. I
14 can prove my relationship to him. We
15 even have the same last name. Yet this
16 didn't matter.

17 To get a simple birth certificate, I
18 would've had to hire an attorney and go
19 before a judge. It would've been so
20 cost-prohibitive that I could not even
21 become an Italian citizen. This lets me
22 work and live anywhere in the European
23 Union that I ever choose.

24 Finally, my dad was able to notarize
25 a letter and the Department of Health

1
2 provided a certified copy of John's
3 birth certificate. The sensitive
4 information it contained was already
5 public via other sources, it turned out.
6 I looked at it, and all that was on it
7 was his date of birth, which is
8 published by Social Security. His
9 census information would have
10 information about his parents' names.

11 All that was on the certificate was
12 information that would be of
13 genealogical value that would be of no
14 relevance to anyone trying to steal
15 somebody's identity, things like how
16 many children they had in the household
17 or what cemetery they're buried in. A
18 hacker cannot use that; however, a
19 genealogist can. Now, this may be
20 undeniably true for people that were
21 born a long time ago, but it's true for
22 those who are still living.

23 A federal law passed in the 1990s
24 made every single American's voter
25 registration a public record. The New

1
2 York State Board of Elections has a
3 website where you fill out a form and
4 they will send you a DVD containing a
5 14-gigabyte text file containing the
6 registration information of every single
7 voter in the state. That is their date
8 of birth, address, full name, party
9 registration, and voting history. I can
10 look that up for pretty much every
11 single person in this room.

12 Okay. Moving on. The identity
13 theft issue itself. I decided to take
14 every single state in the country, I
15 looked at every single vital records
16 law. I compared the 50 states plus
17 D.C., the embargo for birth certificates
18 and death certificates, and
19 cross-referenced that with identity
20 theft rates published by the FTC, on
21 this handy, dandy little graph.

22 Now, if stricter states had lower
23 levels of identity theft, you could
24 argue that this is worthwhile. If that
25 were the case, the liberal states over

1
2 here (indicating), with no embargo
3 period, would have very high rates.
4 Whereas, the strict states like New
5 York, Kansas, Mississippi, --

6 MS. ANHOUSE: Hold on one second,
7 Mr. Ferretti. I just want the record to
8 reflect that Mr. Ferretti is holding up
9 a chart that we are going to mark
10 [Exhibit 1](#) into the record. And if you
11 could leave that chart with us when you
12 leave, that would be great. Thank you.

13 MR. FERRETTI: I actually have a
14 smaller copy, if that would be easier.

15 MS. ANHOUSE: A smaller copy would
16 be better.

17 MR. FERRETTI: I have ten. Okay.
18 So if it were to be, with these stricter
19 states having less identity theft, they
20 would have a lower slope right here, and
21 the line would look like this
22 (indicating).

23 As it turns out, the line is flat.
24 That means that, overall, more lax
25 states have the exact same amount of

1
2 identity theft as stricter states. In
3 fact, the slope of the line is slightly
4 positive, which means states like New
5 York, have a little bit more identity
6 theft. And even that is basically
7 insignificant, and the slope of this
8 line is very clearly zero to anybody who
9 has taken a math class.

10 The fear of identity theft is
11 clearly a mere assumption, and we all
12 know what Felix Unger said about those
13 who assume. Thank you.

14 MS. ANHOUSE: Thank you,
15 Mr. Ferretti. Can you hand the
16 stenographer a copy of that chart? And
17 if you have one for us, that would be
18 great too.

19 MR. FERRETTI: Yes, (handing). I
20 would like to clarify that this is a
21 reference to the years for people who
22 can prove a relationship to get an
23 informational copy, which is all that we
24 need.

25 MS. ANHOUSE: Okay. I'm going to

the other sheet now. Charles Weinstein.
Good morning, Mr. Weinstein.

MR. WEINSTEIN: Good morning and
thank you for the opportunity to speak.
It's Charles Weinstein,
W-E-I-N-S-T-E-I-N.

One of the many hats that I wear is
as a writer of insurance curriculum. I
work for a number of organizations that
provide continuing education for
insurance agents and brokers that are
licensed, and the curriculum that I
write is approved through the Department
of Financial Services. One of the
recent curriculum I have just completed
writing is on the subject of identity
theft.

As you may know, identity theft is
in an insurable event. You can buy
insurance to protect yourself from
identity theft through your homeowners
insurance through your commercial
insurance brokers. As a result of that,
the insurance industry has compiled a

1
2 great deal of information on the subject
3 of identity theft. It's obviously a
4 major concern of the organizations.

5 The Center for Identity Management
6 and Information Protection at Utica
7 College is the primary source for some
8 of the data that I'm going to share with
9 you. But I also want to explain that
10 the Federal Trade Commission, which
11 monitors all reported cases of identity
12 theft in the United States, has very
13 similar statistics.

14 The number one cause of identity
15 theft in the United States over the past
16 ten years, and it's been very
17 consistent, is something that is
18 personal to every person in this room:
19 the theft of a purse, a pocketbook or a
20 wallet. In your wallet, you will have
21 all of the information I need to steal
22 your identity.

23 In most cases, you will have a
24 driver's license, which will show me
25 your name and address, date of birth,

1
2 and where you live, of course. And most
3 people still carry around a Social
4 Security Card, which of course, provides
5 a Social Security number. Armed with
6 that information, I can steal your
7 identity. Approximately 80 percent of
8 the identity theft cases reported in the
9 United States over the last ten years
10 has been as a result of that type of
11 identity theft.

12 The larger cases, the cases, for
13 example, the data breaches with various
14 organizations, such as Anthem, Equifax
15 and others, will take years to develop.
16 The information, though, is already
17 available on the dark web for those who
18 know how to access it, and those who are
19 willing to pay a very small price to
20 obtain hundreds of thousands of records
21 of individuals whose identities are ripe
22 for theft, including much more helpful
23 information as credit scores and
24 information along those lines, health
25 information that would allow for people

1
2 to really go to town on individuals and
3 pick and choose which records they want
4 to use.

5 The top ten causes of identity theft
6 are all delineated. Identity theft from
7 the use of birth and death records, not
8 only doesn't make the top ten, in the
9 United States over the last 20 years,
10 it's averaged less -- well, it's
11 averaged in the middle, single digits
12 nationwide per year. So it's a minor
13 cause of identity theft.

14 MS. ANHOUSE: (Indicating.)

15 MR. WEINSTEIN: Thank you.

16 It is a minor cause of identity
17 theft, but what you are proposing,
18 effectively, is to go after a group of
19 mosquitoes with a cannon. This is not a
20 big cause of identity theft. It is
21 certainly something that will impact a
22 great number of people at a great deal
23 of cost and does not provide the Health
24 Department or The City of New York or
25 the consumers of New York any great

1

protections that they don't already have.

If I want your identity, it is very easy for me to steal it. I don't have to go down to DORIS and dig through the archives to try and find it. Thank you very much for your time.

MS. ANHOUSE: Thank you, Mr. Weinstein. Next up is Mary O'Shea. Is Mary O'Shea here?

MS. O'SHEA: Yes.

MS. ANHOUSE: Okay.

MS. O'SHEA: That's Mary O'Shea, O, apostrophe, capital S-H --

MS. ANHOUSE: Is the red light on?

MS. O'SHEA: (Complying.)

MS. ANHOUSE: There we go.

MS. O'SHEA: Okay. It's Mary O'Shea, O, apostrophe, capital S, -H-E-A. I am not a professional genealogist. I am a family genealogist, I have been developing family trees for my extended family. And the records that you want to prohibit access to

1
2
3
4
5
6
7
8
9

15
16
17
18
19
20
21
22
23
24
25

would greatly impact my research.

My daughter-in-law is a descendant of a Mayflower immigrant. I recently started to document her family tree back, which came from, it ended up, from Massachusetts down to Brooklyn, and I have to provide The Mayflower Society with birth, death, and marriage records for her family, which she does not have. I would not be able to get any of those records with these new regulations you are considering.

Also, my father was a New York City foundling in 1918. So when you think about 100 years, next year would be 100 years since his birth, not that I can find any records on him because he was an abandoned baby, but if he was not, I would be looking for records of his family beyond 100 years.

I'm in my 70s. How many generations of people are you denying access to? My daughter is interested in genealogy, hopefully she will continue what I've

1
2 been doing. But by extending these
3 records out, you're really cutting the
4 line on the family trees.

5 I follow a lot of websites, Facebook
6 pages. I am very appreciative of
7 Reclaim the Records, of the New York
8 Genealogical Society, Bergen County
9 Genealogical Society, with the
10 information and help they give amateurs
11 like me. But you should not at all deny
12 access to the records that you hold,
13 because it's not right.

14 That, in conjunction with the
15 antiquated adoption laws in New York
16 City, New York State, it's terrible.
17 It's a legacy from Governor Lehman years
18 ago, and it doesn't help anybody. All
19 it does is deny people access to their
20 biological families.

21 I would love to be able to find my
22 father's biological family, and many
23 people are in the same situation.
24 Adoptees are not second-class citizens.
25 They are citizens like everyone else,

1
2 and they are entitled to be able to
3 connect with family. And records are a
4 very important part of that. Thank you.

5 MS. ANHOUSE: Thank you, Ms. O'Shea.
6 Robert Friedman.

7 MR. FRIEDMAN: Hello, my name is
8 Robert J. Friedman, F-R-I-E-D-M-A-N.

9 To the Commissioner and Board of
10 Health, I would like to register my
11 opposition to the proposed changes to
12 Article 207 that are the subject of this
13 hearing.

14 I received a Master's Degree in
15 Environmental Health Science from Hunter
16 College more than 30 years ago. My
17 public health career began at the Essex
18 County, New Jersey, Department of
19 Community Health Services, continued for
20 more than a decade at the New York State
21 Department of Labor, Division of Safety
22 and Health, and culminated at the New
23 York City Department of Health and
24 Mental Hygiene, Lead Poisoning
25 Prevention Program.

1
2 During my training as an
3 Environmental and Occupational Health
4 Specialist, I've learned to appreciate
5 the many scientific and medical
6 applications for vital statistics. I
7 also became aware of the necessary
8 restrictions placed upon such data to
9 protect the confidentiality of the
10 individuals whose records became the
11 basis for such studies.

12 Concurrently with my work in public
13 health, more than 20 years ago I began
14 conducting genealogical research on my
15 own time. Ultimately, I left government
16 service, obtained a masters in library
17 and information science, became director
18 of The Ackman & Ziff Family Genealogy
19 Institute at the Center for Jewish
20 History in Manhattan.

21 In 2010, I founded Steps to the Past
22 Genealogical Research Services, and
23 began work for private clients. I am a
24 member of The New York Genealogical and
25 Biographical Society, The Jewish

1
2 Genealogical Society, and Association of
3 Professional Genealogists. If you read
4 the APG Code of Ethics and Professional
5 Practices, you will find that the
6 highest standards of the genealogical
7 community also recognize the need to
8 uphold confidentiality and privacy
9 rights.

10 Because of my many years of
11 experience dealing academically and
12 professionally with such issues, I am
13 particularly interested in the proposed
14 changes to the New York City Health Code
15 regarding birth and death records. I
16 read the online statement of Basis and
17 Purpose and found several sections
18 troubling.

19 First, the paragraph on fraudulent
20 and inappropriate use of birth and death
21 certificates and information does not
22 cite any statistics on the incidents of
23 fraudulent activities involving New York
24 City birth and death records. The cited
25 risks are potential and, therefore,

1
2 entirely speculative. The potential
3 vulnerability of the Health Department's
4 own computer systems for hacking is a
5 much greater risk than the misuse of
6 vital records.

7 Second, the statistics cited under
8 Amendment and Correction of Birth and
9 Death Records/Issuance of New Birth
10 Certificates are not put in context.
11 For example, from 2012 to 2016, the
12 department processed about one-thousand
13 birth changes for individuals born in
14 1940 and earlier. That is out of how
15 many pre-1940 birth records? What is
16 the annual rate? Is it ten percent?
17 One tenth of one percent?

18 The same questions arise regarding
19 the Late Registrations and Death Record
20 Corrections. The department's numbers
21 on deaths of New Yorkers over the age of
22 100: 585, 806, 901 deaths, are of out of
23 how many total? What proportion of the
24 total records created each year do they
25 represent?

1
2 According to the next paragraph,
3 amending a birth certificate after it's
4 been released into the public domain
5 undermines the department's ability to
6 fully substitute the amended certificate
7 for the original. Over time, multiple
8 versions of the same birth records could
9 even be circulating in the public
10 domain, diminishing the reliability of
11 these records and creating confusion
12 around authenticity. Where is the
13 evidence that this has ever been a real
14 problem, rather than an imagined one?
15 Especially in jurisdictions that have
16 open records laws.

17 Other commenters explained in detail
18 the value of open records to
19 genealogists and the harm that it's done
20 when restrictions are adopted. I will
21 not repeat these arguments here.
22 Further, I endorse all the proposals put
23 forward by Reclaim the Records.

24 In summary, I urge you not to adopt
25 the proposed code amendment. The need

1
2
3
4
5
6
7
8
9
10
11
12

17
18
19
20
21
22
23
24
25

for the change has not been demonstrated
and imposing new restrictions on access
to public records would cause far more
harm than good.

MS. ANHOUSE: Thank you,
Mr. Friedman.

I'm just going to ask all of you, I
know that you care deeply, everybody.
If you could just hold your applause and
your comments.

It's important for the stenographer
to get all the words properly, and if
you're making other noise, then it's
hard for her. So I'm just going to ask
for you to let her do her job, really,
so it's all transcribed. Thank you.

The next person is Stanton Biddle.

MR. BIDDLE: Good morning. My name
is Stanton F. Biddle, S-T-A-N-T-O-N,
middle initial F, as in Frank. Biddle
is B-I-D-D-L-E. I am a member of the
New York G and B Society, but I'm here
as the Vice President of the Jean
Sampson Scott Greater New York Chapter

1
2 of the African-American Historical and
3 Genealogical Society.

4 We discussed the proposal in our
5 chapter meeting October 14th, and we
6 drafted a statement and submitted a
7 letter signed by all who were in
8 attendance. I sent the letter last
9 week, so you should have the copy in
10 your records. I have another copy here.
11 I would like to read that letter.

12 We, as members of the Jean Sampson
13 Scott Greater New York Chapter of the
14 Afro-American Historical and
15 Genealogical Society, AAHGS-New York,
16 strongly object to the proposed rules
17 regarding access to public birth and
18 death records of New York City.

19 Our national organization was
20 founded in 1977, with a commitment to
21 the preservation of the history,
22 genealogy, and culture of the
23 African-ancestored populations of local,
24 national, and international communities.
25 Our local chapter was established in

1
2 1989 with a specific focus on the
3 African-ancestored populations of the
4 New York City metropolitan area.

5 Africans and descendants of Africans
6 have been an integral part of the City's
7 life and culture from its earliest
8 settlement by the Dutch and continues to
9 be enriched by new arrivals from
10 throughout the African diaspora each
11 year. It is our mission to discover,
12 share, and preserve the stories of these
13 New Yorkers -- stories of these New York
14 families, whether recent immigrants or
15 residents of many generations.

16 Timely access to the original
17 materials affected by this proposal is
18 critical and essential for our work.
19 The proposed restrictions would create
20 an excessive interference for each of us
21 and our fellow members seeking to trace
22 our families within New York City's
23 vital records.

24 We ask that the Commission consider
25 guidelines suggested by the New York G

1
2 and B Society. Specifically, access to
3 birth records after 75 years, access to
4 death records after 50 years, and access
5 to an index to death records after 25
6 years with all the provisions that they
7 requested.

8 Beyond genealogical research, many
9 of our peers and colleagues require
10 access to these records when tracing
11 medical histories within our families.
12 Specifically, those related to
13 genetically-inherited diseases. Timely
14 access to these records is essential for
15 those seeking to understand and treat
16 medical conditions.

17 Therefore, we ask that you consider
18 creating an informational copy of birth
19 and death records, which could not prove
20 identity for financial and other
21 transactions, but would instead provide
22 information necessary for researchers.

23 We thank you for your attention to
24 this important matter. This letter is
25 signed by, as I said, all of the members

1
2
3
4
5
6
7
8
9
10
11
12
13
14
15
16
17
18
19
20
21
22
23
24
25

in attendance of that meeting. Thank
you.

MS. ANHOUSE: Thank you, Mr. Biddle.
If you want to give a copy of that
letter to the stenographer, that would
be great.

MR. BIDDLE: We sent the letter and
a petition.

MS. ANHOUSE: Okay. However, we'll
have it here, but she's an
independent --

MR. BIDDLE: All right (handing).

MS. ANHOUSE: The next person is
Carole -- no, wait. Wrong list. Susan
R. Miller.

MS. MILLER: Good morning. Susan R.
Miller, M-I-L-L-E-R.

Since my friend Terry was cut off
with her time, I'm going to read off a
little bit more of Terry's remarks
first.

With access limited to 125 years,
she's referring to births there, I
believe, many of us would not live long

1
2 enough to work on our family history.

3 The New York Archdiocese Catholic
4 records will be available in 2018. The
5 New York Archdiocese will allow access
6 to baptismal records up until about the
7 1917 time period.

8 Partnering with Find My Past to
9 digitize 150 plus years of records, the
10 Brooklyn Diocese will also allow
11 scanning and broader access to baptismal
12 and marriage certificates. And the GGG,
13 that's the German Genealogy Group, based
14 on Long Island, is taking the lead on
15 scanning and digitizing the records, the
16 society who created the indexes that are
17 currently at the New York City Municipal
18 Archives. Those were the additional
19 remarks by Terry, and -- one moment,
20 please.

21 Regarding my remarks, there was
22 already a comment letter from the New
23 York G and B, so I'm speaking as an
24 individual now, not as a staff member.
25 I am a staff member of the New York G

1
2 and B. I am a resident of Nassau
3 County, but have a father, grandparents,
4 who were all born in New York City,
5 lived in New York City, died in New York
6 City.

7 The issues created by the proposed
8 Amendment Provisions to Article 207 of
9 the New York City Health Code would
10 negatively impact my ability to conduct
11 family research for myself and for
12 friends. I do not take clients. I am
13 not a professional genealogist in that
14 respect.

15 In addition, it would negatively
16 impact and compound the attitude that
17 many people see from the New York City
18 Health Department as being a very
19 difficult department to work with. I
20 would strongly encourage shorter time
21 frames for the release of records from
22 the New York City Department of Health
23 to the archives.

24 I believe death records should be
25 open after ten years. The deceased

1
2 person does not have privacy rights.
3 The informant, on the record, if they
4 are still living at the same address,
5 which is one of, I believe, the
6 confidential public information pieces
7 that you're concerned with, would
8 usually be recognizable if they lived in
9 the same place for ten years through
10 many other records. A couple of people
11 have already mentioned some of those
12 records. They could include tax
13 records, public telephone directories,
14 voter records, social media, and all.

15 The other point I would like to make
16 is: If there's a thought of closing
17 death records due to the cause of death,
18 I think the Department of Mental Health
19 and Hygiene is perpetuating the
20 acceptability of stigma regarding cause
21 of death. Please, I ask you, do not
22 contribute to encouraging any stigma
23 like that. A long time ago, there was a
24 stigma attached to cancer. More
25 recently, AIDS and other

1
2 sexually-transmitted diseases,
3 potentially mental health issues.
4 Whatever the next stigmatized cause of
5 death might be, please don't help people
6 to think these are bad causes of death
7 and keep records closed because of that.

8 So, again, I would ask you to
9 provide more open access for
10 genealogists and other family
11 historians. I think indexes should be
12 open in one year, understanding that a
13 yearly transfer would not undo
14 administration, but it shouldn't be
15 continually open. It would have to be,
16 you know, a group at a time at the end
17 of a year. So those are my comments,
18 and I'll e-mail that later to the
19 Commission. I don't have a printout.

20 MS. ANHOUSE: I believe the
21 stenographer will be able to get all of
22 it. We are here because we want to have
23 a record of what you're saying. So,
24 thank you.

25 MS. MILLER: Yes.

1
2 MS. ANHOUSE: Next up is Carole
3 Kramer. Is Carole Kramer here?

4 MS. KRAMER: My name is Carole A.
5 Kramer; C-A-R-O-L-E, the letter A,
6 K-R-A-M-E-R. I did not prepare
7 anything. I have a letter, which I will
8 give the stenographer, but I'm not going
9 to read from that. I'm just going to
10 talk from my heart.

11 I assume that the people sitting in
12 front of me on this panel are not
13 genealogists. If you were, we would all
14 be here preaching to the choir. But I
15 assume you are not genealogists, so I'm
16 going to go back to real basics.

17 When a genealogist does research --
18 and I am a family genealogist, not a
19 professional genealogist. When we do
20 research, we obviously can find
21 information from many sources, but it is
22 important to us to find primary sources.
23 We need to be able to document and
24 certify that the information we have
25 found is accurate.

1
2 I can find a birth record from a
3 census, but that is secondary
4 information. It is hearsay information,
5 because it depends on the person who is
6 taking that information on the census,
7 and very often it is not accurate. We
8 need access to the primary sources, to
9 the birth records, to the death records.

10 By making this inaccessible to us,
11 you are making our job extremely
12 difficult, and family genealogy can be
13 exceptionally important, not only for
14 the medical records to determine if I am
15 an inheriter of a potential disease, but
16 as someone else stated, that a relative
17 died and it was because of their records
18 that they were able to prevent probate
19 because they could prove the lineage. I
20 had that same situation in my family,
21 where if it were not for my records,
22 that will would still be in probate,
23 because many of the relatives were
24 almost impossible to trace.

25 I beseech you, do not make it harder

1
2 for us. If you make this access easier,
3 you are benefitting many, many thousands
4 of people for a myriad of reasons.
5 That's all.

6 MS. ANHOUSE: Thank you, Ms. Kramer.
7 Next on the list -- I'm going back and
8 forth between the two lists, everyone.
9 So there's no preference, and I don't
10 want anyone to be confused, so it's as
11 fair as I can make it. Cathy Horn is
12 next.

13 MS. HORN: Hello, my name is Cathy
14 Horn; C-A-T-H-Y, H-O-R-N. I am a
15 genealogist purely for my own
16 self-interest, but I am in support of
17 the New York Genealogical and
18 Biographical Society's proposal. I'm
19 also in support of Reclaim the Records.

20 I read through your proposal as to
21 why you want to extend the time frame
22 before you release the records.
23 However, I find, in looking through it,
24 that it is very suspect. An example, on
25 page six, here you mentioned that

1
2 previously these documents, the vital
3 records, have been made public and
4 released to DORIS at inconsistent
5 intervals. That's correct. Right now,
6 looking at your own policies, you are
7 not in compliance with your own
8 policies.

9 If the records or death records were
10 released after 50 years, there are
11 already 68 years which you're behind in
12 adhering to your own policy. Likewise,
13 with birth records, they should've been
14 made available after 75 years, and yet
15 it says here that the most recent
16 records that you're holding and have not
17 been released are 1910. That means 170
18 years.

19 You are not complying with your own
20 policy, yet now you want to extend the
21 years. Why would we assume that you
22 would then comply with that policy, when
23 you haven't in the past? You should at
24 least clean up your own offices first
25 before you want to do any changes --

1
2
3
4
5
6
7
8
9
10

25

make any other changes.

We rely on these records as genealogists. You may not consider us to be much of anything, but we are one of the top two biggest groups in the country. At least, a hobby group, but certainly millions and millions of people, and it is increasing. We ask that you follow the New York G and B's guidelines, what they suggest, and not extend the time frame before you release the records.

And as to identity theft, I have in my purse two cards, which would be very easy for identity theft. One is my Medicare Card; it has my Social Security number on it. And then, of course, my New York State ID. It has, not only my name and address, but it also my birth date. The easiest way to get any information is to go out and ask for it.

Equifax has come up recently in the news. And that is a source of identity theft. It is certainly not with the

1
2 vital records that we, as genealogists,
3 go and look for and search through
4 DORIS. And I think it's time to look at
5 the world as it is today and realize
6 that identity theft is not getting my
7 birth certificate, it's going out and
8 hacking somebody's computer system. So
9 please, reconsider this.

10 MS. ANHOUSE: Next on the list is
11 Roger Joslyn. Am I saying that
12 properly, Roger Joslyn?

13 MR. JOSLYN: Good morning. Roger
14 Joslyn. R-O-G-E-R; J-O-S, as in Sam,
15 -L-Y-N. Thank you for the opportunity
16 to address you this morning. I trust
17 that my comments and those of others
18 here, through their submissions, will
19 reach the other members of your group
20 that were responsible for studying and
21 putting together the proposal so that
22 they will know also what comments have
23 been made here.

24 I had a long introduction to
25 introduce myself and my background. I'm

1
2 pretty well-known in the international
3 genealogical community, having been a
4 full-time professional genealogist
5 approaching 40 years. I think I've been
6 very active in that time, in the
7 professional and scholarly parts of the
8 field. I think what's more important is
9 to say that I'm not a stranger to a
10 hearing such as this.

11 Beginning in the late 1970s, the
12 issues of preservation of access of
13 vital records and other sources used in
14 family history and in other
15 genealogically-related areas, such as
16 estate settlements, title to real
17 property matters, dual citizenship, and
18 other lineage-based situations, all of
19 which require, among other
20 documentation, certified copies of
21 birth, marriage, and death certificates.

22 My direct experience began in Boston
23 when there were hearings held with
24 regard to preservation and access with
25 the Commonwealth's copies of birth,

1
2 marriage, and death records, in setting
3 up not only the archiving of the older
4 records, but also defining the access
5 and preservation of those records that
6 would be kept by the Commonwealth's
7 Department of Health.

8 Beginning in the 1980s, I was
9 actively involved with the first
10 national committee that was concerned
11 with the preservation and access of all
12 sorts of records throughout the U.S.,
13 including vital records. Most recently,
14 the successor to that committee, known
15 for some years as the Records
16 Preservation and Access Committee, or
17 RPAC.

18 I served as a representative for the
19 American Society of Genealogists, and
20 RPAC has been very instrumental in not
21 only monitoring access and preservation
22 of important records throughout the
23 entire country and keeping the public
24 informed, but has also helped numerous
25 times in educating and helping those

1
2 responsible for the task of
3 preservation, access, and in developing
4 policies.

5 A few years ago, I served with other
6 genealogists, attorneys, and others in
7 meeting with staff of the New York
8 Department of Health and Mental Hygiene,
9 chaired by former Health Commissioner
10 Beth Beecher (phonetic). The New York
11 Department of Health and Mental Hygiene
12 is holding this public hearing today for
13 comment on proposed health code
14 amendments that would set up a schedule
15 for archiving the New York Municipal
16 Archive's birth and death certificates
17 concurrently under the department's
18 care.

19 This is the one item on which you
20 are asking for comment. To my
21 knowledge, no plan has been in place or,
22 back when there seems to have been one,
23 followed for over 30 years when birth
24 and death records, with some minor
25 exceptions, were last transferred to the

25

archives.

So my first major comment is: "Yes," to a transfer plan, but "no," to the proposed specifics for such a plan, which are not acceptable on many levels for many reasons, of which I don't have time to address here. What I propose, though, first and foremost, is this plan is conceived without input from those who have an interest and need for access to those records.

My strongest suggestion, therefore, is to put aside your proposal and set up a committee, a small one, to work in the department first and develop a plan that truly meets the needs of the public and also works to address the concerns with regard to birth and death certificates, including fraudulent use and privacy.

I would say that in doing so, you need to study the successful work, collaborative, cooperative work that has been done in Maine, Connecticut, and Oklahoma, and in the Commonwealths of

1
2 Pennsylvania and Virginia. We should
3 all look to the solutions made in
4 drafting a good plan for New York City.

5 Many have already addressed many of
6 the other points I'd like to make. But
7 I would like to end by saying that the
8 bottom line is few other states in
9 developing cooperative efforts for a
10 workable plan in access and preservation
11 is the bottom line. In this way,
12 everyone wins, and while the door may
13 need to be closed in some instances, it
14 is not to be locked with the idea that
15 protection is offered to a few at the
16 loss to the majority. Thank you for
17 your time and consideration.

18 MS. ANHOUSE: Thank you.
19 Mr. Joslyn, if you would like to leave
20 the letter that you didn't get to
21 read --

22 MR. JOSLYN: It's all scribbled.
23 I'd be glad to submit something at a
24 later time.

comments today is --

MR. JOSLYN: 5:00 p.m.

MS. ANHOUSE: -- 5:00, today. If you didn't have a chance to read your whole thing and want to send us a written thing, it's due by 5:00 today.

AUDIENCE MEMBER: What's the e-mail address?

MS. ANHOUSE: It's in the notice; you do it online. The next person on both lists is Leslie Corn.

MS. CORN: Good morning. My name is Leslie Corn, L-E-S-L-I-E, C-O-R-N. I am a forensic-certified genealogist and a fellow of the New York Genealogical and Biographical Society. Thank you for the opportunity to voice my opinion today.

I fully support your concern about protection of personal identity of the living. But I strongly disagree with your proposed extreme limitation on public access to birth and death records and your reasoning for that limitation. Your proposed amendment is based on

1
2 arguments of potential identity theft
3 and violation of privacy through record
4 access. Yet open record access, past
5 and present, has not proved this out.

6 Take the policies of Florida's
7 Department of Health, for instance, a
8 state that offers unlimited access to
9 birth and death records. Has their open
10 record access led to violation of
11 personal identity and they're just going
12 to let those records out anyway?
13 Certainly not.

14 Closer to home, the New York State
15 Department of Health restricts access to
16 birth records for 75 years and death
17 records to 50 years, far less of a
18 waiting period than your restriction of
19 125 years for births and 75 years for
20 deaths in your proposed amendment of
21 Provisions of Article 207 of the New
22 York City Health Code.

23 As additional proof of the error of
24 an assumption of rampant identity theft
25 based on record access, other countries

1
2 with open access to birth and death
3 records, such as England and Ireland,
4 have not reported a rise in identity
5 theft because someone anywhere in the
6 world can order unlimited records of the
7 living and the dead.

8 My associate in Germany,
9 professional genealogist, Uwe Porten,
10 writes, "In Germany, you have access to
11 all civil vital records, regardless of
12 date, if the person in question is your
13 ancestor: parents, grandparents,
14 great-grandparents." Mr. Porten goes
15 on, "I have no information about
16 identity theft, never heard about it
17 over here, and I do not think that there
18 is any in connection with vital
19 records."

20 Access to vital records is essential
21 to my work in assisting attorneys,
22 executors, and distributees in testate
23 and intestate matters that typically
24 trace three to four generations of a
25 decedent's paternal and maternal lines.

1
2 New York State Surrogate's Courts
3 require extreme proof of kinship to
4 settle the estates. Much of this proof
5 is found in vital records.

6 New York City Department of Health's
7 proposed restriction on access will
8 severely hamstring rightful distribution
9 of estates and negatively impact
10 resolution of other legal matters, such
11 as entitlement to real property and dual
12 citizenship. Time and time again, your
13 department has denied rightful access to
14 vital records by entitled parties in
15 cases I've worked on, entitled parties
16 as defined on your website, such as
17 executors to estates.

18 How can revealing a woman's maiden
19 name on her or her child's birth or
20 death certificate -- an argument that
21 you make in support of restrictive
22 access -- be a violation of privacy when
23 that same information is readily
24 available in naturalization records,
25 marriage records, marriage notices,

1
2 death notices, obituaries, Social
3 Security applications, estate files,
4 deeds, directories, and various other
5 public sources?

6 When Jane Smith and John Doe
7 announce their engagement in their local
8 paper, does Jane Smith redact her maiden
9 name for fear of identity theft? The
10 magnificent genealogical horse is
11 already out of the barn and running
12 faster every day, thanks to the work of
13 an ever-growing collection of
14 individuals, genealogical societies,
15 libraries, archives, and corporate and
16 governmental agencies.

17 I recommend that the New York City
18 Department of Health reconsider the
19 retrogressive proposition and adopt the
20 following in transferring records to the
21 Department of Records and Information
22 Services: One, transfer birth records on
23 January 31st of the year following a
24 hundred years after date of birth. Two,
25 transfer death records on January 31st

of the year following 50 years or less
after the date of death. Thank you.

MS. ANHOUSE: Thank you, Ms. Corn.
The next person up is Robert Avner. I
have Robert Avner and Regina Avner.

MR. AVNER: Yes.

MS. ANHOUSE: Are you both --

MR. AVNER: Yes. Two different
people.

MS. ANHOUSE: Okay. So you are both
on the list.

MR. AVNER: Yes.

MS. ANHOUSE: Okay.

MR. AVNER: Okay. My name is Robert
Avner; A-V, like in Victor, -N-E-R.
Could I get your names? I can't quite
see from here. Because you just kind of
sit there with poker faces, and I can't
quite make out what reactions you have,
or if you have any reaction. A little
disconcerting, I'm sure, to me and to
the rest of the audience here.

Can I get an idea of what your
background is in records, records

information? I know this is a hearing,
but I'm just curious what your
background is. Who are you?

MS. ANHOUSE: Mr. Avner, this is a
time for you to make your opinions
known.

MR. AVNER: I understand that. I
understand that.

MS. ANHOUSE: It's not a time to
post questions. If you would like to
make comments about the proposal, you're
welcome to. Otherwise, I would ask that
you cede your time to someone else.

MR. AVNER: No, I'm not ceding my
time. I'm not ceding my time. But I
think it would be nice for us to all
know who you are. Who are you? I know
you work for the Department of Health.
But what is your position in records?
What knowledge do you have?

MS. ANHOUSE: Mr. Avner, this is all
stated at the beginning of the hearing.

MR. AVNER: I was not here until a
quarter after ten, because this is a

hard, difficult building to find.

In any case, I'm sure I'm repeating some of the things people have said already, but this is the second assault in two years that you've done on public records. The first you didn't even advertise, you kept it so close to the vest that nobody even knew about it. So you're a bunch of sneaks.

MS. ANHOUSE: Again, I'm going to ask you not applaud. It eats into his time, and makes it impossible for the stenographer to hear.

MR. AVNER: Okay. Well, now you're taking up my time.

The ability to obtain these records have allowed me, and I'm sure many other people, to reconnect with family. My family was partially decimated in the Holocaust, so it's allowed me to reconnect with some of them that have survived. Without access to these records, I wouldn't be able to.

The time period should be reduced.

1
2 We should be sitting here talking about
3 the time period being reduced, not this
4 ridiculous amount of years you're going
5 to add on. The time period should be
6 much less.

7 I have a copy, and I'll make it
8 public; this is a person's death
9 certificate from California, Santa Cruz
10 (indicating). This person died in the
11 last -- I don't know -- 25, 30 years.
12 They print on this informational copy.
13 It's not a record you can use in getting
14 any kind of further documents. Why
15 doesn't New York City introduce this? I
16 mean, aren't we able to do the same
17 things Santa Cruz can do? I mean, are
18 they so much better than we are?

19 Okay. This is San Francisco
20 (indicating). This is the application
21 for San Francisco. I'm sure people in
22 the genealogical community have seen
23 this. I know you've never seen this or
24 even cared to have looked for it, but
25 this allows you to send for an

informational copy.

MS. ANHOUSE: (Indicating.)

MR. AVNER: I know, two minutes. I didn't think you were giving me the victory sign, although I think I deserve it.

This allows us to get an informational copy of a document that cannot be used for any kind of legitimate purpose of getting a further document or identification. You have them from other cities in California. You have them from the State of California.

Pennsylvania recently, on Ancestry, put down all the death records. They actually digitized all of their death records until 1965 and have them for free, if you are a subscriber to Ancestry.com.

Also, Florida, you can get a death record on somebody who died last week. Last week, not 75 years. It's absurd. Transfer your records to DORIS that you

have and are holding on to. Transfer all those records.

Okay. You can sit there with poker faces; I don't care. No reaction, all right. You give the worst example of government workers. I've worked for the City of New York for 25 years, but looking at you folks, it's embarrassing. Embarrassing.

MS. ANHOUSE: Thank you, Mr. Avner. I'm going to ask you to please stop. If you continue this, I'm going to ask the health police to escort people out who are interrupting, because I want to get through this. We have the room for a limited period of time and everybody wants to speak. Randi Koenig, am I saying that properly?

MS. KOENIG: It's Koenig.

MS. ANHOUSE: Koenig, I'm sorry.

MS. KOENIG: Good morning. I'm Randi Koenig; R-A-N-D-I, K-O-E-N-I-G. Thank you for the opportunity to speak today. I didn't initially plan on

23
24
25

speaking today, so I'm going to keep my
comments brief and very succinct.

I am a professional genealogist with
over 15 years experience as a
professional genealogist, and I deliver
kinship proceeding testimony on a
regular basis. And as you may know, as
a professional genealogist, one of the
things that New York State requires for
a kinship proceeding is that people must
provide their true lineage and actual
certificates.

And, on a regular basis, I spend a
lot of time at the Department of Health
trying to obtain records for these
families. I actually have death
certificate requests that should be
public record, where people have signed
off and requested them, and it's the
real family and the correct lineage, and
they are not able to get them even to
help settle an estate.

The recommendations that you're
making and the changes to the statutes,

1
2 my concern is the knock-on effect that
3 that's going to cause to the courts,
4 both the probate courts, as well as the
5 other courts, where people are going to
6 have to get court orders in order to get
7 those death records for a cousin or an
8 aunt or uncle, where those are required
9 by the courts, and I cannot get those
10 without subpoenas.

11 Just so that you understand that
12 there's more than just genealogy as fun.
13 This is my profession, and I'm here to
14 represent the hundreds of thousands of
15 people that are my clients. Thank you.

16 MS. ANHOUSE: Thank you, Ms. Koenig.
17 The next person on the list is Regina
18 Avner.

19 MS. AVNER: Good morning. It's
20 Regina, R-E-G-I-N-A, A-V, as in Victor,
21 -N-E-R. It is the same last name.
22 Okay. I'll be very brief. I'll give
23 you all a break. I'm a licensed
24 clinical social worker. I've worked at
25 a City hospital, I've recently retired.

1
2 I worked at a City hospital in
3 in-patient medical surgical units,
4 dialysis. I've worked with AIDS
5 patients for the past 35 years. At the
6 beginning of the AIDS crisis, I began.

7 It is appalling what you propose to
8 do because it is in the complete
9 opposite direction that genetic research
10 is going. I don't understand why you're
11 doing this. You are denying patients
12 that really -- people that have serious,
13 serious life-threatening illnesses --
14 the ability of the researchers to really
15 go back and do their due diligence, and
16 they have done marvelous work. I've
17 seen such tremendous almost miracles
18 happen in the past 35 years.

19 So as you're basically setting the
20 clock back years, back to the years
21 before we had any kind of the present
22 technology that we have, it makes no
23 sense what you're doing, and I don't
24 know why you're doing this.

25 But anyway, I will be brief. I will

1

24
25

give you all a break, because I think my husband basically said it all.

MS. ANHOUSE: Thank you, Ms. Avner. Next on the list is Lauren Orensteen -- Orenstein. I'm sorry.

MS. ORENSTEIN: Hello, my name is Lauren Orenstein, L-A-U-R-E-N. Last name, O-R-E-N-S-T-E-I-N. I appreciate the opportunity to speak today.

I have been working as a professional genealogist for the last seven years. There have been countless times that the inability to get birth and death records has impeded my ability to assist my clients. Further restricting access to these records will only create a greater impediment for probate cases in surrogate's court.

In addition, this will prevent sellers of real estate to obtain clear title. This is not about me as a professional or hobbyist. This is about the thousands of clients who legitimately need this information to

23
24
25

move on with their lives. Thanks very much.

MS. ANHOUSE: Thank you. Next on the list is Andrew Sverdlove, I believe. I hope I'm not mispronouncing it. Sorry.

MR. SVERDLOVE: You're not mispronouncing it. My name is Andrew Sverdlove, S-V-E-R-D-L-O-V-E. I've been a resident of this state my whole life. I've done genealogy for 60 years.

The proposed change is irresponsible, obstructionist, and leads many of us, many of us, to be highly suspect of what is going on behind the closed doors. I only heard about this meeting last night. That is extraordinary.

You talked about accessing in your pamphlet or something that you handed out, I never saw it. I worked for many years volunteering time with the Italian Genealogical Society, taking records that your department was supposed to

1
2 transfer decades ago. We made up lists.

3 Open records, open society has been
4 a hallmark of our country. There were
5 two speakers, Mr. Blazer and
6 Mr. Weinstein, on identity theft
7 absolutely verifying the little bit that
8 I know. The two people I know that had
9 identity theft, one was taken by
10 stealing their mail. The other one was
11 done by a bank clerk. No one is going
12 to be using these records.

13 I think there may be something of
14 interest, perhaps. If you do not know,
15 what is the history in this country of
16 the origin of banks asking, "What is
17 your mother's maiden name?" That was
18 started in the 1930s, and it was a way
19 of filtering out the Jewish people who
20 had very Eastern European names. Then
21 it became just a way of life. For other
22 people, the identity was done visually.
23 They saw you weren't the right color.

24 This is bringing us back, backwards.
25 These records should, like many other

1
2 states, Florida, for example, be opened
3 immediately. You never, as has already
4 been pointed out, even follow your own
5 rules and regulations.

6 Genealogy is one of the fastest
7 growing hobbies, as others have said.
8 We are a country of immigrants and their
9 descendants, and using these various
10 resources that you have, I have been
11 able to reunite families. I have been
12 able to locate people after 50 years who
13 wanted to find their birth mother, their
14 mother wanted to find them. It would be
15 a catastrophic tragedy to put these
16 records into hiding.

17 Truly, this would put us back. My
18 dog, I have a better genealogy on. The
19 Angus steak that I ate came from a cow,
20 whose genealogy I can get. I don't want
21 us to be a secret society. I want us to
22 be an open society, and I think those
23 that are here will always question
24 governments that hide information to
25 protect us. Yes, I understand. This is

1
2 why we have fire, police, public health.

3 Governments should be supporting an
4 open society, "open" meaning
5 accessibility. It's our way of knowing
6 that you are accountable to us. We, in
7 some way, are paying for your salary. I
8 was a New York City resident for nine
9 years in one stretch, three in another.
10 Where is my money going?

11 I remember the difficulty I've had,
12 and I've heard others say here, with the
13 Department of Health records and
14 removing records from the public
15 library. Absolutely shocking. And
16 e-mails we never knew about and
17 transcripts of conversations to
18 Missouri, which I only learned an hour
19 ago.

20 The interesting thing is that
21 genealogy is for -- even those of us who
22 may or may not be religious -- a part of
23 our Western heritage, background. It is
24 very much in the Bible, who you were and
25 generations, ten generations from Adam

1

to Noah, another ten generations. We have become a society in which these are important things. We want to know our roots.

Henry Louis Gates, Jr., the host of Finding Your Roots, going on its fifth year now, is one of the most popular shows. Where would it be if your kind of proposal were in effect anyplace else?

I hope that you not only reverse this proposal, but that someone has the chutzpah, the guts, to propose opening the records in the ways of other states, particularly Florida comes to mind, and California. Thank you very much for your time.

MS. ANHOUSE: Thank you, Mr. Sverdlove. Next up is Dennis Duffy.

MR. DUFFY: Yes, that's correct. My name is Dennis Duffy. That's D-E-N-N-I-S. Duffy, D-U-F-F-Y. Thank you for the opportunity to speak.

Earlier, I believe it was

1
2 Mr. Weinstein who mentioned that he had
3 statistics that showed the incidents of
4 identity theft, which is, I think,
5 really the critical issue here. Ninety
6 percent or more was due to having your
7 wallet or your purse stolen or your mail
8 or something like that. And very little
9 was leftover that might possibly be due
10 to access to vital records.

11 I believe he argued that we
12 shouldn't close the door on everybody to
13 protect a few. Now, that's a judgement
14 call. If I was one of the few, I might
15 want the door closed. But I think the
16 problem here is that there are multiple
17 doors, and if you close the door, there
18 are others.

19 Two things I'd like to mention --
20 one has actually been fixed, but who
21 knows what will happen next. A few
22 years ago, the Commonwealth of Puerto
23 Rico was required to invalidate every
24 birth certificate it had ever issued.
25 Think about that for a second.

1
2 Everybody's birth certificate, whether
3 you were 80 years old or six days old,
4 they invalidated them all. Of course,
5 not too many people know this, so if
6 somebody were to present you with a
7 Puerto Rican birth certificate with a
8 stamp on it, you would probably accept
9 it. But they passed a law to make them
10 all invalid. Why?

11 Puerto Rico had a practice of
12 issuing multiple copies of birth
13 certificates to parents, because it was
14 custom in Puerto Rico to give copies to
15 the godparents, to the grandparents.
16 The law required you to give an original
17 birth certificate to the school that
18 your child was going to attend. You
19 didn't have to just prove residence,
20 like we have to do here on the mainland.
21 You had to give them an original birth
22 certificate.

23 Now, when the identity thieves found
24 out that they could break into schools
25 and go into the basement and find the

1
2 records of the kids who enrolled 20
3 years ago or 30 years ago, they helped
4 themselves. So unfortunately, Puerto
5 Ricans have a much higher incidence of
6 identity theft today than the other
7 areas in the United States.

8 But here's another current problem:
9 For 20 years, I worked for the Town of
10 Hempstead in a federally-funded program
11 to help people find jobs. And of
12 course, we couldn't help illegals find
13 jobs. That would be crazy, the federal
14 government helping illegals find jobs.

15 So we had to verify that people had
16 the right to work in the United States
17 by being a citizen or having a green
18 card or some other authorization. And,
19 of course, because we got audited by the
20 federal auditors, we had to make copies
21 of all these documents so that when they
22 audited us, they could see that we were
23 doing our job correctly.

24 So we accumulated tens of thousands
25 of birth certificates, green cards, all

1
2 sorts of stuff, Social Security numbers,
3 and at 5:00 we shut the door and went
4 home. And guess who came in at night,
5 every night? The cleaning crew. And
6 they had access to all of these records,
7 and we don't even know if the people on
8 the cleaning crew -- because it was a
9 subcontractor, it wasn't town
10 employees -- we don't even know if they
11 were legal. So there are a lot of other
12 ways that identity theft happens.

13 Another thing that is going to
14 happen as a result of the Equifax data
15 breach -- this is so colossal that the
16 rules of the way that industry operates
17 are going to change. People are --
18 there's going to be laws, I'm sure, at
19 the federal level that no mortgage, no
20 credit, can be taken out in your name
21 without verifying with you. As opposed
22 to this system, where they just kind of
23 do it unless you object. When we think
24 about it today, the whole industry is
25 upside down.

Can I submit a letter written by my son?

MS. ANHOUSE: Yes. Give it to us.

MR. DUFFY: Okay. Thank you very much.

MS. ANHOUSE: Actually, no. Give it to the stenographer. We'll get it from her. Thank you, Mr. Duffy.

MR. DUFFY: You're welcome (handing.)

MS. ANHOUSE: Next on the list is, I think it is Bab, or Bob, Lenseth.

MR. LENSETH: Bob.

MS. ANHOUSE: Okay. Sorry.

MR. LENSETH: Morning. I'm Bob Lenseth, L-E-N-S-E-T-H. I'm just an individual here who, several years ago after retiring, decided to look into my family history.

My grandfather and grandmother on my paternal side immigrated in the 1800s to New York City, and my grandmother on my maternal side immigrated in the early 1900s and met her husband here. So I

1
2 needed to find out something. I have
3 one older brother who is cognoscente of
4 things, and nobody knows about my aunts
5 and uncles, very little was known about
6 them.

7 So I came to the New York City
8 Health Department to find out
9 information. The people down on Worth
10 Street were great to work with, but then
11 I started to find some of the records
12 weren't available and I was told to go
13 over to -- I'm sorry. Reverse that.
14 Chambers Street did the archives and
15 then I was told some of the records that
16 I was looking for were available only on
17 Worth Street.

18 So I started going in there, and I
19 would pick and choose who to find and
20 eventually found that it was easier if I
21 went up to the 42nd Street Library, went
22 through the indexes of birth and death
23 and got certificate numbers. Then, when
24 I got down to your computer, which is
25 really not a computer, it looked like an

1

19
20
21
22
23
24
25

Atari down on Worth Street, I would plug in the information and I would get the records after paying my fee and working with your people down there. And I stood in many a line for three or four hours to do this on several occasions.

Then all of a sudden, I had a lapse over the holidays, and I came back about two months later to go to the next battery, turned in an application for an aunt and I was told, "You can no longer have that." I said, "Wait a minute." They said, "We changed the rules." I said, "When was that posted? When --" "Oh, it was all over the paper." I haven't found that.

What I did then say is, "Could I speak to a supervisor?" So I went in and a supervisor did meet with me and she said, "Well, New York City can make any rule we want, whenever we want, and there's nobody who's going to tell us, in the State or anywhere else. We are independent when it comes to these

23
24
25

records."

Okay. I need you to look at that.
Yes, we can make the rules here in New
York City and it's a great community.
But we need to look at what is available
to our community, the people who are
trying to find information on their
families. I did receive a certificate,
because it was a grandfather, and I got
that certificate. It had to be mailed
to me, because they couldn't find it
that day in the department on Worth
Street.

It came in and it was a certificate
of an Asian-American in Queens, not my
grandfather. So, I brought it back and
we were able to swap the right one, but
things do happen by mistake.

And in addition, right after the one
change, I sent an online e-mail that is
in the government Health Department form
to the commissioner and with information
that says "This is answered." I've
never received an answer from that, and

I was objecting to the problems of
receiving the change.

So please correct things, get things
down to where people like myself and
others can get access to our family
members, because we are the ones that
are starting to find out and want to
find out about it. So, thank you.

MS. ANHOUSE: Thank you very much.
We have the room until 12:30. I think
we're going to get through the whole
list.

AUDIENCE MEMBER: Is there a way to
add my name to the list at this point?

MS. ANHOUSE: No. At this point
it's noon and we have to leave. The
next name I have is Leonard Katz,
Leonard N. Katz.

MR. KATZ: My name is Leonard N.
Katz: Kilo, Alpha, Tango, Zulu. A
couple of quick points. Think of a
society where no one gets shot for
standing up to governments and
regulations, and I think that the whole

25

purpose of our being here to is to
validate that point.

Your Commission that you've
appointed, essentially you work for us
and you really are us at some levels.
Families, I think we can't lose sight of
those facts. We live in a free society.
We're looking for transparency. We are
looking to protect people in certain
ways. But it's been pointed out by
many, many people here this morning that
there are so many ways information that
you're looking to protect, shall we say,
is available in other areas anyway.

So the kind of rule you're looking
to make is not going to help in any way.
They're going to hurt. There's only a
hundred and some odd people here, but
they represent thousands and thousands
of people through organizations, through
their clients, and you have to realize
that the things that are proposed here
don't seem to have a real positive
effect.

1
2 My father always had an expression,
3 he said, "There's a million reasons out
4 there. When you want to do something,
5 you pick and choose the ones you want."
6 And that's what I see happening here.
7 You have a letter you sent out, you
8 listed certain points, they were
9 refuted.

10 There's many suggestions, positive
11 suggestions, that have been offered
12 today. I hope you take cognoscente of
13 those things and possibly bring together
14 some people that are involved in
15 genealogy and work with them, because a
16 lot of suggestions regarding openness,
17 transparentness, and things that are
18 being done in Florida and various other
19 states, they're working. And there's no
20 reason why they shouldn't work here in
21 New York.

22 I don't believe there's any real
23 reason to follow through with the
24 proposals that were made, and if you
25 want to do something positive, you might

1

25

take cognoscente, again, of those suggestions and incorporate those things. Thank you very much.

MS. ANHOUSE: Thank you, Mr. Katz. Next on the list is Madelaine Piel, Piel.

MS. PIEL: Piel.

MS. ANHOUSE: Piel. Sorry. We're going to need to take a short break for the stenographer. So hold on one minute.

(A brief recess was taken from 12:07 p.m. to 12:08 p.m.)

MS. ANHOUSE: The stenographer says she's ready to go.

MS. PIEL: Good afternoon. My name is Madelaine Piel.

AUDIENCE MEMBER: Microphone.

AUDIENCE MEMBER: The microphone is off.

MS. ANHOUSE: Press the button, so --

MS. PIEL: (Complying.)

MS. ANHOUSE: Yes, there you go.

1
2 MS. PIEL: Thank you. My name is
3 Madelaine Piel, spelled
4 M-A-D-E-L-A-I-N-E. Middle initial "D.",
5 P-I-E-L. I am formally the vice chair
6 of the New York Genealogical and
7 Biographical Society, founded by several
8 of my ancestors, the Purple brothers,
9 who were very active doctors and
10 genealogists in New York City.

11 I'm also a former trustee of the NY
12 G and B. I'm a family genealogist.
13 I've researched my own family, who've
14 lived in Manhattan for more than seven
15 generations. I am very active as well
16 in the Democratic Party. I am the
17 president of the Lenox Hill Democratic
18 Club. It was founded in 1956.

19 My objective is both with genealogy
20 and with Democratic politics, to bring
21 openness and transparency to government
22 and to the people, because we the people
23 are "We the People," and you are as much
24 of the people as we are the people. And
25 we need to have openness and

1
2 transparency in all of your actions so
3 that we can go forward in a constructive
4 civilization and world that we live in
5 today, which is a rather difficult
6 assignment.

7 We need your help. We need you to
8 keep our records open. I, currently, am
9 not able to access my grandmother, who
10 died January 6, 1949. That's an
11 impossibility. Someone in our family
12 had a situation where we needed to
13 change a Time Warner account -- that
14 dates me, because we are now using
15 Spectrum -- and in order to do that, we
16 had to provide a death certificate, in
17 order to change the account, because the
18 account, for more than 35 years, had
19 been in that person's name.

20 These are the kind of basic issues
21 and problems that need transparency and
22 openness in government. The people that
23 I have also worked with -- I've been
24 elected a judicial delegate a number of
25 times; I helped elect the circuits who

1
2 are currently in New York County. I
3 need to help bring transparency to the
4 people, both through my genealogy
5 activities as well as through my
6 Democratic Party activities, which I
7 could be a Republican as well. I'm a
8 recovered Republican, as a matter of
9 fact.

10 So I hope that you will hear this.
11 RPAC is something I was also involved
12 in, and around the country, I hear the
13 people in Virginia fought very strongly
14 to keep records open. I believe we
15 should have an open society and open
16 records.

17 Thank you for your time, and thank
18 you for your considerations. I also
19 just have one quick question, when would
20 this go before the City Council, or does
21 it not have to go before the City
22 Council to become law?

23 MS. ANHOUSE: It's a Board of Health
24 matter. It's not a New York City
25 Council matter.

1

2

MS. PIEL: So do you report to the
City Council in any way on this issue?

3

4

MS. ANHOUSE: I can't engage in that
advisory colloquy at this point.

5

6

MS. PIEL: Do you report to the
Mayor on this issue?

7

8

MS. ANHOUSE: Ma'am, this is the
point for you to tell us what you think,
not for questions.

10

11

MS. PIEL: Okay. I'm just asking,
because I'm certainly happy to lobby
them as well, very actively.

13

14

MS. ANHOUSE: Thank you, Ms. Piel.

15

MS. PIEL: Thank you very much.

16

MS. ANHOUSE: Thank you, Ms. Piel.

17

Next up is Jonathan Piel.

18

19

MR. PIEL: Good afternoon. My name
is Jonathan Piel, J-O-N-A-T-H-A-N,
P-I-E-L. The same last name as my wife,
obviously. I thank you for giving us
this opportunity to address the question
that's before us.

23

24

As I'm the state committee man from
the 76th Assembly District to the

25

1
2 Democratic State Committee, from this
3 position I have seen the strong interest
4 that my fellow citizens have in who they
5 are, where they have come from. I would
6 just like to make two brief points.

7 The first is that I think your
8 regulation is locking the door of a barn
9 in which there is no horse. The
10 resources available to people who want
11 to steal identities are deep and easily
12 accessible through computer hacking and,
13 indeed, any other kinds of public
14 records.

15 The second point I'd like to make is
16 that I would ask you to consider very
17 strongly the deep interest that members
18 of the public have in their ancestry and
19 where we have come from, how we have
20 become Americans, how our families have
21 contributed to American society.

22 And finally, you are dealing with
23 the interest of a growing profession of
24 professional genealogists who help their
25 fellow citizens answer these questions

1
2 and who also help their fellow citizens
3 deal with legal questions that involve
4 records of birth and death. So we would
5 ask you very strongly to weigh those two
6 matters as you consider these rules.
7 Thank you very much.

8 MS. ANHOUSE: Thank you, Mr. Piel.
9 The last person on our list is Michael
10 Gilberg.

11 MR. GILBERG: I'm sorry. Ran a
12 little late today.

13 MS. ANHOUSE: No problem. Have a
14 seat, sir.

15 MR. GILBERG: Michael Gilberg,
16 G-I-L-B-E-R-G. I'm a disability rights
17 attorney, and I've done genealogy of my
18 own family for a number of years. I
19 have nothing prepared, but I can talk
20 off the cuff based on what others have
21 said.

22 First of all, as somebody who is an
23 attorney, I know about privacy laws, and
24 the idea that anybody could do identity
25 theft with a birth certificate or death

1
2 certificate is honestly crap, because
3 you need Social Security or financial
4 info. I've never heard of any genealogy
5 involving bank or financial info.

6 And quite frankly, Social Security
7 number, nobody really uses it for
8 genealogy, except that the U.S. Social
9 Security Administration makes all their
10 death records public, including Social
11 Security number. So you want to be more
12 restrictive than the Social Security
13 Administration.

14 States like California have
15 everything public, Texas. So you're
16 proposing a rule that would put New York
17 City as less progressive than Texas.
18 When Texas is a more progressive state
19 than New York City, I mean, I feel like
20 quite honestly you're setting us back a
21 hundred plus years. It's like something
22 the Trump administration would do.

23 As somebody who has done genealogy
24 for years, I see New York City having
25 one of the most restrictive death laws

1
2 in the nation, which is not what you
3 would expect from a City that's a
4 progressive leader. I think that, as I
5 said, this identity theft thing is a red
6 herring. I have seen no speakers who
7 have said that identity theft is a real
8 concern.

9 Someone else mentioned the New York
10 City Council. I have spoken to
11 Councilman Benjamin Kallos, who is a
12 friend of mine and is big proponent of
13 open records and have made him aware of
14 the issue, because, ultimately, for you
15 to say you don't answer to City Council
16 or the Mayor is just not the case. They
17 can set laws and policies. It sounds,
18 from what others have said, that you're
19 just trying to cover the fact that
20 records have not been released when they
21 were supposed to.

22 As I said, I can get death info from
23 the Social Security Administration for
24 somebody who died a year ago. That will
25 give me their Social Security number,

1
2 but it might not give me their parents'
3 names. Quite frankly, parents' names
4 are more valuable genealogically than a
5 Social Security number. I don't know
6 anybody who does genealogy that cares
7 about Social Security numbers, but yet
8 the Social Security Administration has
9 decided once you die, you lose any right
10 to privacy anyway.

11 But again, states like Texas,
12 California, everywhere. I mean, it's
13 amazing to me how New York City, as a
14 progressive leader, is one of the least
15 progressive states in this regard. I
16 can't get a birth certificate for my
17 grandmother, who I knew most of my life,
18 who was born in 1911 and died at almost
19 91, because she's just a year after the
20 cutoff, and that's my grandmother.

21 I think, like every one else has
22 said, there's no issue with people using
23 birth or death records to steal your
24 identity. If it was that common, I
25 could go online and steal Trump or Obama

1
2 or anyone else famous' identity, because
3 all of their information is publicly
4 available on Wikipedia.

5 In fact, the most famous person I
6 have found related to me is Federal
7 Reserve Chair Jenna Yellin. She is the
8 easiest person to find information on,
9 because her information is all on
10 Wikipedia.

11 Let me just close by saying --
12 sorry. I lost my train of thought. The
13 birth and death information, like I
14 said, as an attorney, I'm aware of
15 privacy issues. This is not a privacy
16 issues. This is a fake issue.

17 MS. ANHOUSE: Thank you. Is there
18 someone else that wanted to speak? I
19 believe there's one other person.

20 MS. BELL: I did.

21 MS. ANHOUSE: We have the room for a
22 little bit more, so let's let everybody
23 speak who wants to speak.

24 MS. BELL: Thank you. I appreciate
25 it.

21
22
23
24
25

MS. ANHOUSE: No problem. Have a seat, please.

MS. BELL: Okay. My name is Lorraine Bell, B-E-L-L. I'm a genealogist, a Director at the NY G and B and the Regent of an Interborough Chapter of the Daughters of the American Revolution, which is a lineage society.

The DAR is also an important organization that has helped to preserve historic documents, buildings, and monuments, as well as being major supporters of education through our scholarship programs and actual DAR schools, as well as upholding patriotic endeavors that support our veterans and the current serving military.

The members of our organization provide millions of volunteer hours that support the communities we live in. For example, in the past year, our national society wrote a check to the National Park Foundation for \$380,000, made a donation to the New American Museum of

1
2 the American Revolution of half a
3 million dollars to honor American
4 patriots, as well as given hundreds of
5 thousands of dollars for historical
6 preservation, education, and to
7 patriotic causes.

8 We have more than 188,000 members
9 across the country. Almost 7,000
10 members in New York State, and almost
11 1,000 members in New York City. Our
12 goal as an organization is to grow to
13 250,000 members by the year 2026, and we
14 cannot do that if access to vital
15 records is restricted.

16 I'm here to state that our society
17 relies on direct access to vital
18 records. We need to provide birth,
19 marriage, and death certificates for any
20 prospective member through three
21 generations from the new member, and
22 then on to many generations to an
23 American patriot.

24 In order for our national society to
25 verify lineage, we help women of all

1
2 races, religions, and backgrounds
3 connect to their past, and this is a
4 very meaningful service to our members.
5 For example, this past August at the
6 Battle of Brooklyn, our flag bearer was
7 an ancestor of a slave, and it was
8 incredibly important to her to prove her
9 ancestral genealogy.

10 It is also the fastest growing hobby
11 in our country. It's only second after
12 gardening. This increased interest in
13 connecting people to genealogy has
14 helped us increase membership and
15 interest in our society.

16 Our DAR chapter and our organization
17 is opposed to any increased restrictions
18 to access to documents. We believe in
19 increased transparency, not less. We
20 must have access to vital records,
21 otherwise your suggested changes will
22 impede our ability to grow our
23 membership and society.

24 I'm in agreement with those who have
25 spoken previously, before me. I believe

1
2 in access to public records. It will
3 not prevent identity theft. That is a
4 specious reason, and I implore you not
5 to institute the proposed amendments to
6 Article 207 of the Health Code, as it
7 will be impossible for our organization
8 to add new members, as so many of our
9 ancestors have come through New York
10 City. Thank you for your time.

11 MS. ANHOUSE: Thank you. Is there
12 anybody else who wants to speak?

13 AUDIENCE MEMBER: (Indicating.)

14 MS. ANHOUSE: You spoke already,
15 sir.

16 AUDIENCE MEMBER: Yes, but if you
17 have time --

18 MS. ANHOUSE: I don't have time,
19 we're very on the cusp. But there is
20 one other woman here. We're very much
21 on the cusp, but I think it's very
22 important for everybody who wants to
23 speak, to speak.

24 MS. NOVAK: Good morning, afternoon,
25 evening. My name is Michelle Novak, and

I have been a resident of Manhattan for 30 years, a business owner in Manhattan for 20 years. I run a design and branding firm who does non-profit as well as financial services, so I have seen both sides of this argument.

But in addition to that, my first New York City ancestor arrived when this place was called New Amsterdam in 1628. Ever since then, my family has bounced around about a 30-mile radius, and here I am today. This really isn't a story about my ancestors, which would get me on an eight-hour thing. It's about health.

In 1948, my mother was seven years old. The family had a cabin, no power, no running water, up in Greenwood Lake. The family went up to the cabin to winterize the cabin for the winter.

Her father, who was a police captain, was out preparing a dock and ran a nail through his hand. He ended up in a hospital in New Jersey and his

1
2 condition worsened. Then he ended up in
3 Mount Sinai on the East Side of
4 Manhattan. While my mother, again, she
5 was seven, went to go play in the
6 playground across the street from the
7 hospital, a playground that's still
8 there, he passed away.

9 They never had spoke about what he
10 had passed away from. So when I started
11 doing genealogy, I decided to look up
12 his death record. I received it from
13 The City of New York, found that it was
14 a congenital heart defect. It was
15 something that was eye-opening for my
16 family. My mother, as well, who had
17 never known this information, said, "I
18 think he had a sister as well."

19 So we looked up that record. It
20 turned out, congenital heart defect.
21 From that record, we were able to trace
22 her birth, we actually looked it up. We
23 were doing the index on the death, had
24 to get the birth to confirm it was the
25 right person and to this day, it's an

1
2 issue for our family. Because in 1968,
3 I was born in a hospital about 30 miles
4 from where my ancestor landed with a
5 murmur in my heart. And for my entire
6 life, it had been a mystery to me why I
7 had these heart problems, why I had
8 fainting spells and the rest of it.

9 So these records are not so much --
10 we've talked a lot about genealogy
11 today, I work a lot with the state
12 archives in New Jersey, I care about
13 records, but I also care about health.
14 Health for me and for my family, and
15 without these records, I wouldn't have
16 known this family history.

17 It's changed the way I've changed my
18 health and my regime, and I always like
19 to say I spend a ton of money on
20 ordering records, but these records are
21 really priceless for me. Because
22 without them, I would've had no idea of
23 this family history.

24 The new rules that are on the table
25 today would not have allowed me to get

my grandfather's death record. He died in 1948, I think that's 42 under the current year -- Excuse me. I'm bad at math, being an artist. It would not have allowed me to get his death record nor that of his sibling, who died young. Nor would it have allowed me to have her birth record.

All of those records are incredibly important to me and still resonate today, and that's my remarks. Thank you very much.

MS. ANHOUSE: Ms. Novak, I'm sorry. Could you just spell your last name for the stenographer?

MS. NOVAK: I'm sorry. It's N-O-V-A-K.

MS. ANHOUSE: I just wanted to make sure we had you right. Okay.

Well, there being no further business -- is there one other person that wanted to --

MS. GAIL: (Indicating.)

MS. ANHOUSE: You wanted --

MS. GAIL: Yes.

MS. ANHOUSE: Okay. This is it.
The last one. We are at 12:21,
according to my iPhone now.

MS. GAIL: Okay. My name is Gillian
Gail; G-I-L-L-I-A-N, G-A-I-L. Gail is
my last name. I have to clarify that
every time.

I am probably one of the youngest
ones here. I actually started about ten
years ago in genealogy. I'm a family
genealogist at this point. Everyone in
my family, older than me, younger than
me, ask me on whatever they come up
with, more recently for health things.
Because at one point I worked a couple
of blocks away from Chambers Street and
went down there pretty much every day
during my lunch break, to the point that
the security guard saw me and knew me by
name.

What really is concerning with this
proposal is none of the records I was
looking at would've been available under

1
2 this new proposal. At this point, I'm
3 at a wall because the records I'm
4 looking for are for possible deaths,
5 that I'm not entirely sure of, which is
6 why there's a wall, occurred in the 50s
7 and 60s, that under this new rule would
8 block, probably for the rest of my life.

9 I'm in my 20s and this proposal
10 would basically halt everything that I
11 have for 70 years, is what you're
12 proposing, for death records, 125. So
13 anything I don't know right now, you're
14 basically saying I'm never going to know
15 in my lifetime. That's a long time.
16 I'm not that old. There's a lot of
17 people here much older than me and --
18 yes.

19 So for my expected lifetime, would
20 be in effect 100 years, I want to be one
21 of the people who lives 100 years.
22 That's my ultimate goal. But what this
23 is doing is restricting it from me, from
24 my friends. I started this as a Girl
25 Scout. The Girl Scouts have a patch for

1
2 family history, and one of the things is
3 you have to go back and learn something
4 new, something further. Find where you
5 came from. Find something new, where
6 people lived, where they died, how they
7 are related to you. Go as wide as you
8 can. Go as far as you can.

9 I was able to do that in Girl Scouts
10 in high school from birth records, from
11 death records, marriage records -- but
12 this is about the birth and death.
13 Those are what we found to find, who
14 actually came here. "Oh, so and so said
15 they came here." But this one was
16 actually born here. They're really
17 here. There's a document from a primary
18 source saying that they're here and this
19 story is true, this story is not.

20 What ended up, unexpectedly, is I
21 found a lot of medical information that
22 I had no idea was even hiding in these
23 records. I didn't know, like the last
24 lady, a family history of heart
25 problems. My mom had no idea there was

1
2 a family history of heart problems. Her
3 father died of a heart attack. Her aunt
4 died of a complication from her heart.
5 Her mother died of something from her
6 heart.

7 Without these records, we wouldn't
8 know that all of her siblings had
9 cancers or something, had heart
10 problems. There's, on one side -- a
11 huge side, where every single person --
12 I have, like, ten people that died of
13 the exact same thing unexpectedly at
14 early ages in the 40s.

15 I'm sure there's more, but I can't
16 get to them because I believe they were
17 around in the 50s, and I don't have
18 access to those right now. As aunts and
19 uncles and great aunts and great uncles,
20 I'm not a direct relative to them, so I
21 can't go and get the primary sources.

22 With the birth certificates, I was
23 lucky enough that my grandfather still
24 had his real original one, because when
25 he joined World War II, he changed his

1
2 year of birth. When it came to burying
3 him, we needed an original birth
4 certificate to find when he was actually
5 born. If you look on my mother's birth
6 certificate, it's one year. Her sister,
7 another year. So going by his kids
8 isn't even a fact. Look at his first
9 marriage, one year. Second marriage,
10 another year. He went back and forth.

11 Both of them were legally,
12 technically, his birth certificate, but
13 making this -- if we had to go through
14 New York City, we would've had a
15 problem, and we would've been one of the
16 many families with the probates just
17 stuck in limbo, because you need a year
18 of birth.

19 So I'm completely against this
20 proposal. I've been a member of the
21 German Genealogy Group. I found that
22 from going through the records and
23 looking it up, they made the indexes
24 that the records are used. So I became
25 a member of that. I've been working on

1
2 the indexes for that. So I would like
3 to keep working on that. My friends
4 have asked me to help them with them,
5 but I can't because they're in that
6 limbo of in between. It's not old
7 enough to go into the records, but
8 they're not directly related close
9 enough to be able to get the records
10 themselves. Thank you.

11 MS. ANHOUSE: Thank you, Ms. Gail.
12 It is 12:26 and everyone who has wanted
13 to testify has testified. We are
14 adjourning this hearing. The hearing is
15 over. Thank you very much.

16 (Whereupon, [Exhibit 1](#),
17 Mr. Ferretti's Chart, was marked for
18 identification, as of this date, by the
19 reporter.)
